Falcons Flight:

Falcon Flight Ada Graham, Frank Graham, 1978 Describes recent efforts to save the vanishing peregrine falcon a frequent object of indiscriminate hunting due to misconceptions surrounding birds of prey **Falcon** Helen Macdonald, 2016-11-15 Before best selling author Helen Macdonald told the story of the goshawk in *H Is for Hawk* she told the story of the falcon in a cultural history of the masterful creature that can cut the sky in two with the perfectly aerodynamic profile of a raindrop as she so incisively puts it In talon sharp prose she explores the spell the falcon has had over her and by extension all of us whether we've seen them through binoculars framed on gallery walls versified by poets flown as hunting birds through Manhattan windows sewn on flags stamped on badges or winnowing through the clouds over abandoned arctic radar stations Macdonald dives through centuries and careens around the globe to tell the story of the falcon as it has flown in the wild skies of the natural world and those of our imagination Mixing history myth and legend she explores the long history of the sport of falconry in many human cultures from Japan to Abu Dhabi to Oxford she analyzes the falcon's talismanic power as a symbol in art politics and business and she addresses the ways we have both endangered and protected it Along the way we discover how falcons were mobilized in secret military projects their links with espionage the Third Reich the Holy Roman Empire and space programs and how they have figured in countless stories of heroism and of course the erotic Best of all Macdonald has given us something fresh a new introduction that draws on all her experience to even further invigorate her cherished subject The result is a deeply informed book written with the same astonishing lyrical grace that has captivated readers and had everyone talking about this writer cum falconer **The Casket**, 1839 The Field Illustrated A. H. Godfrey, Alexander Henry Waddell, 1920 **Feather Trails** Sophie A. H. Osborn, 2024-05-02 Named ABA Birding Book Club's Best Book of the Year This book deserves to be read widely because it is only in coming to understand these animals suggests Osborn that we can choose to love and help them New Scientist The story of one woman's remarkable work with a trio of charismatic endangered bird species and her discoveries about the devastating threats that imperil them In *Feather Trails* wildlife biologist and birder Sophie A H Osborn reveals how the harmful environmental choices we've made including pesticide use the introduction of invasive species lead poisoning and habitat destruction have decimated Peregrine Falcons Hawaiian Crows and California Condors In the Rocky Mountains the cloud forests of Hawaii and the Grand Canyon Sophie and her colleagues work day to day to try to reintroduce these birds to the wild even when it seems that the odds are steeply stacked against their survival With humor and suspense *Feather Trails* introduces us to the fascinating behaviors and unique personalities of Sophie's avian charges and shows that what endangers them ultimately threatens all life on our planet More than a deeply researched environmental investigation *Feather Trails* is also a personal journey and human story in which Sophie overcomes her own obstacles among them heat exhaustion poachers rattlesnakes and chauvinism Ultimately *Feather Trails* is an inspiring poignant narrative about endangered birds and how our choices can help to ensure a future not only for

the rarest species but for us too An intimate look at the wonder and effort needed for working with endangered species in the wild Osborn's matter of fact writing style and wry humor make the reader part of the action Booklist starred review
