Women Fielding Danger Martha K. Huggins,Marie-Louise Glebbeek,2009-01-16 In a compelling exploration of an oft hidden aspect of qualitative field research Women Fielding Danger shows how identity performances can facilitate or block field research outcomes The book asks questions that are crucial for all women engaged in field research Do researchers enter their field site with a totally neutral identity Can a researcher s own identity be at odds with how interviewees see her Could a researcher be of the wrong gender sexuality nationality or religion for those being studied Must some of a researcher s identities be subsumed in certain research settings How much identity disguise is possible before a researcher violates research ethics or loses herself Together these questions inform the book s themes of the centrality of gender social and political danger the negotiation of identities and on site ethics Focusing on ethnographic research across a wide range of disciplines and world regions this deeply informed book presents practical to dos and technical research strategies In addition it offers unique illustrations of how the political geographic and organizational realities of field sites shape identity negotiations and research outcomes Understanding these dynamics the authors show is key to surviving the ethnographic field

*The Sphere* ,1920 **Medieval Hunting** Richard Almond,2011-10-24 Hunting was a major economic and leisure activity throughout the later European Middle Ages but while aristocratic practices have featured in studies of romantic and narrative literature hunting in its wider sense across the social spectrum and with attendant male and female roles has largely been ignored by modern medieval historians Richard Almond s study brings vividly to life the universality and centrality of hunting to medieval societies both as an economic necessity and as an expression of medieval humanity s almost atavistic sense of oneness with nature Medieval Hunting dispels some of the myths and misunderstandings surrounding hunting including the persistent views that it was exclusively an aristocratic male pursuit Using a wide variety of contemporary textual and art historical evidence Richard Almond shows that hunting including fishing and poaching was enjoyed by women as well as men
