Spam Kings Brian S McWilliams, 2014-09-09 More than sixty percent of today's email traffic is spam. In 2004 alone five trillion spam messages clogged Internet users' inboxes, costing society an estimated 10 billion in filtering software and lost productivity. This expose explores the shadowy world of the people responsible for today's junk email epidemic. Investigative journalist Brian McWilliams delivers a fascinating account of the cat and mouse game played by spam entrepreneurs in search of easy fortunes and anti-spam activists. McWilliams chronicles the activities of several spam kings, including Davis Wolfgang Hawke, a notorious Jewish-born neo-Nazi leader. The book traces this 20-year-old neophyte's rise in the trade where he became a major player in the lucrative penis pill market, a business that would eventually make him a millionaire and the target of lawsuits from AOL and others. *Spam Kings* also tells the story of anti-spam cyber vigilantes like Susan Gunn, a computer novice in California whose outrage led her to join a group of anti-spam activists. Her volunteer sleuthing put her on a collision course with Hawke and other spammers who sought revenge on their pursuers. The book sheds light on the technical sleight of hand and sleazy business practices that spammers use: forged headers, open relays, harvesting tools, and bulletproof hosting, and warns of the ever-inventive spammers' development of new types of spam. Physics of Black Holes Eleftherios Papantonopoulos, 2009-01-28 Black Holes are still considered to be among the most mysterious and fascinating objects in our universe. Awaiting the era of gravitational astronomy, much progress in theoretical modeling and understanding of classical and quantum black holes has already been achieved. The present volume serves as a tutorial, high-level guided tour through the black hole landscape, information paradox, and blackhole thermodynamics. Numerical simulations of black hole formation and collisions, braneworld scenarios, and stability of black holes with respect to perturbations are treated in great detail, as is their possible occurrence at the LHC. An outgrowth of a topical and tutorial summer school, this extensive set of carefully edited notes has been set up with the aim of constituting an advanced-level, multi-authored textbook which meets the needs of both postgraduate students and young researchers in the fields of modern cosmology, astrophysics, and quantum field theory.

Accretion of Extraterrestrial Matter Throughout Earth's History Bernhard Peucker-Ehrenbrink, Birger Schmitz, 2012-12-06 Every year Earth is bombarded with about 40,000 tons of extraterrestrial material. This includes microscopic cosmic dust particles shed by comets and asteroids in outer space, meteorites, as well as large comets and asteroids that have led to catastrophic events in the geologic past. Originally considered only a curiosity, extraterrestrial matter found on Earth provides the only samples we have from comets, asteroids, and other planets. Only recently has mankind started to actively collect extraterrestrial matter in space: Apollo program, Stardust mission, rather than to wait for its delivery to Earth. Still, most of our knowledge of the origin and evolution of our solar system is based on careful studies of meteorites, cosmic dust, and traces of large impact events in the geologic record, such as the mass extinction that terminated the Cretaceous Period and led to the extinction of the dinosaurs. This book

summarizes our current knowledge of the properties origin orbital evolution and accretion mechanism of extraterrestrial matter accreted on Earth and sheds light on accretion processes and fluxes in the geologic past The chapters in the first part of the book are arranged in order to follow extraterrestrial matter from its origin in space its orbital evolution on its way to Earth its interaction with the Earth magnetosphere and atmosphere to its more or less violent collision with the Earth s surface In the second part of the book several chapters deal with the present day flux of cosmic dust and meteorites to Earth Finally several chapters deal with the reconstruction of the accretion history of extraterrestrial matter on Earth starting with the most recent geologic past and ending with the very early violent accretion period shortly after the formation of Earth Moon and other solid planets in our solar system **The ESPN Baseball Encyclopedia** Peter Palmer,Gary Gillette,2007
