*Performing the Renaissance Body* Sidia Fiorato,John Drakakis,2016-03-21 In the Renaissance period the body emerges as the repository of social and cultural forces and a privileged metaphor for political practices and legal codification Due to its ambivalent expressive force it represents the seat and the means for the performance of normative identity and at the same time of alterity The essays of the collection address the manifold articulations of this topic demonstrating how the inscription of the body within the discursive spheres of gender identity sexuality law and politics align its materiality with discourses whose effects are themselves material The aesthetic and performative dimension of law inform the debates on the

juridical constitution of authority as well as its reflection on the formation and the moulding of individual subjectivity Moreover the inherently theatrical elements of the law find an analogy in the popular theatre where juridical practices are represented challenged occasionally subverted or created The works analyzed in the volume in their ample spectre of topics and contexts aim at demonstrating how in the Renaissance period the body was the privileged focus of the social legal and cultural imagination

**Language Typology** Alice Caffarel,J. R. Martin,Christian M. I. M. Matthiessen,2004 This book is intended as a systemic functional

contribution to language typology both for those who would like to understand and describe particular languages against the background of generalizations about a wide range of languages and also for those who would like to develop typological accounts that are based on and embody descriptions of the systems of particular languages rather than isolated constructions. The book is a unique contribution in at least two respects. On the one hand it is the first book based on systemic functional theory that is specifically concerned with language typology. On the other hand the book combines the particular with the general in the description of languages: it presents comparable sketches of particular languages while at the same time identifying generalizations based on the languages described here as well as on other languages. The volume explores eight languages covering seven language families: French, German, Pitjantjatjara, Tagalog, Telugu, Vietnamese, Chinese, and Japanese.
