He Swings A Straight Stick:

He Swings a Straight Stick Paul Weinman, 1985 How to Feel a Real Golf Swing Bob Toski, Davis Love, Jr., Robert Carney, 1998-03-17 After teaching hundreds of thousands of golfers in the Golf Digest Instructional Schools they helped to organize Bob Toski and Davis Love Jr perfected a revolutionary way of bringing instinct back to the golf swing In easy to follow drills and exercises How To Feel a Real Golf Swing shows golfers of all abilities how to isolate the different parts of the swing Each step is designed so that the golfer internalizes the feeling of each part of the swing and can finally put it all together for better results How To Feel a Real Golf Swing is the perfect way for golfers to learn on their own time and at their own pace to develop a solid and dependable golf swing the basis of any good golf game **The Fine Green Line** John Newport, 2010-01-20 What happens when a man leaves home for a year to pursue his dream One day playing a particularly spectacular round of golf husband and father John Paul Newport suddenly tastes what it s like to be a pro Deciding to take a year off and hit the road playing golf s mini tour circuit Newport embarks on a wild trip through America s fairways Over the course of his journey inside the somewhat shady often hilarious underbelly of professional golf he uncovers a world of people so totally addicted to golf to the delusion of achievable perfection that they sacrifice everything else to the quest He also discovers the nature of his own obsession with the game and how this constant pursuit of perfection on the golf course reflects the same challenges and frustrations one encounters in life What does it take to master such an intricate unpredictable game In golf as in life why is one so consistently incapable of acting up to one s clearly established potential As Newport struggles to cross that Fine Green Line the infinitely subtle yet critical difference between the top golf professionals and those who never quite make it he realizes that life like golf doesn t let you get away with anything This is a story about letting go of fear facing challenges and embracing risks a compelling personal journey that captures many of the frustrations and elations of midlife both on and off the course **Line Drives** Brooke Horvath, Tim Wiles, 2002 We wait for baseball all winter long Bill Littlefield wrote in Boston Magazine a decade ago or rather we remember it and anticipate it at the same time We re create what we have known and we imagine what we are going to do next Maybe that s what poets do too Poetry and baseball are occasions for well put passion and expressive pondering and just as passionate attention transforms the prose of everyday life into poetry it also transforms this game we write about play or watch Editors Brooke Horvath and Tim Wiles unite their own passion for baseball and poetry in this collection Line Drives 100 Contemporary Baseball Poems providing a forum for ninety two poets Line after line like baseball itself game after game and season after season these poems manage to make the old and the familiar new and surprising The poems in these pages invite interrogation and the reader like the true baseball fan must be willing to play the game for these poems are fun fresh angry nostalgic meditative and meant to be read aloud They are keen on taking us deeply into baseball as sport and intent on offering countless metaphors for exploring history religion love family and self identity Each poem delivers images of pure beauty as the poets

speak of murder and ghost runners and old ball gloves of baseball as a tie that binds families and indeed the nation together of the game as a stage upon which no nonsense grit and skill are routinely displayed and of the delight experienced in being one amid a mindlessly happy crowd This book is true to the game s long season and to the lives of those the game engages

Knowledge and Cosmos Robert K. DeKosky, 2023-10-10 In Knowledge and Cosmos Development and Decline of the Medieval Perspective 2nd Edition Robert K DeKosky focuses on issues in astronomy cosmology physics matter theory philosophy and theology vital to the Copernican Revolution This book describes efforts among individuals advocating different world views to fit new ideas compatibly into broad perspectives reflecting four traditional patterns of interpretation teleological mechanical occultist and mathematico descriptive These four modes had guided medieval accounts of heavenly phenomena material process and motion The teleological explanation prevalent in Aristotle s natural philosophy posited final causes ends or goals toward which objects strove or attempted to become Ancient classical atomists had emphasized strictly mechanical explanations invoking direct material contact and collision of moving matter as agents of physical change Traditions of astrology magic and alchemy embraced an occultist pattern of interpretation citing hidden forces opaque to both sensual detection and rational understanding as explanations of various phenomena Finally the mathematico descriptive approach interpreted natural phenomena according to geometric or arithmetic relationships unlike the other three this did not involve causal explanation of a process Part I discusses

development of the four patterns in the ancient period and their uneasy medieval relationships with each other and with basic Judaeo Muslim Christian exigencies of faith Theory of the heavens follows including the mathematico descriptive approach of Ptolemaic astronomy the teleological and mechanical cosmology of Aristotle and occultist interpretations of astrologers and magicians Part I then turns to matter and materiality discussing differences among the mechanical philosophy of classical atomism teleological emphases in Aristotle s material theory and occultist assumptions of some alchemists Finally Part I analyzes conceptions of motion focusing on Aristotelian interpretations and critical commentaries thereon during the Middle Ages Part II relates struggles of leading early modern figures to adapt new concepts e g Copernicus heliocentric astronomy cosmology Galileo s inertial theories of motion and Kepler s elliptical planetary orbit to an allegiance to two or more of the four patterns of interpretation By this approach it identifies decreasing dependence on teleological explanation of physical phenomena as crucial to decline of medieval interpretations of those phenomena followed by rejection of teleology in the natural philosophy of Descartes and subsequent fruitful confluence of the mechanical mathematico descriptive and occultist patterns in the physics and cosmology of Isaac Newton
