Mental Illnesses Luciano LAbate,2012-01-05 In the book Mental Illnesses Understanding Prediction and Control attention is devoted to the many background factors that are present in understanding public attitudes immigration stigma and competencies surrounding mental illness Various etiological and pathogenic factors starting with adhesion molecules at one level and ending with abuse and maltreatment in childhood and youth at another level that are related to mental illness include personality disorders that sit between mental health and illness If we really understand the nature of mental illness then we should be able to not only predict but perhaps even to control it irrespective of the type of mental illness in question but also the degree of severity of the illness in order to allow us to predict their long term outcome and begin to reduce its influence and costs to society How can we integrate theory research evidence and specific ways to deal with mental illness An attempt will be made in the last conclusive chapter of this volume

The Cult and Science of Public Health Kevin Dew,2012 In contemporary manifestations of public health rituals and events people are being increasingly united around what they hold in common their material being and humanity As a cult of humanity public health provides a moral force in society that replaces traditional religions in times of great diversity or heterogeneity of peoples activities and desires This is in contrast to

public health's foundation in science particularly the science of epidemiology. The rigid rules of scientific evidence used to determine the cause of illness and disease can work against the most vulnerable in society by putting sectors of the population such as underrepresented workers at a disadvantage. This study focuses on this tension between traditional science and the changing vision articulated within public health and across many disciplines that calls for a collective response to uncontrolled capitalism and unremitting globalization and to the way in which health inequalities and their association with social inequalities provides a political rhetoric that calls for a new redistributive social programme. Drawing on decades of research the author argues that public health is both a cult and a science of contemporary society.
