Little Big Houses Working With Architectural Models:

Little Big Houses Jari Jetsonen, 2001 Exploring the fascinating material and miniature world of architectural scale models this guide reviews the carefully crafted replicas of landmark works of both Finnish and international 20th century architecture telling not only of the importance of the schemes but also of the rich tradition of craftsmanship **The Architectural Models of Theodore Conrad** Teresa Fankhänel, 2021-06-17 Based on the recent discovery of his fully preserved private archive models photos letters business files and drawings this book tells the story of Theodore Conrad 1910 1994 the most prominent and prolific architectural model maker of the 20th century Conrad s innovative models were instrumental in the design and realization of many icons of American Modernism from the Rockefeller Center to Lever House and the Seagram Building He revolutionized the production of architectural models and became a model making entrepreneur in his own right Yet despite his success and the well known buildings he helped to create until now little has been known about Conrad s work and his impact on 20th century architectural history With exclusive access to Conrad s archive as well as that of model photographer Louis Checkman both of which have lain undiscovered in private storage for decades this book examines Conrad s work and legacy accompanied by case studies of his major commissions and full color photographs of his works Set against the backdrop of the surge in model making in the 1950s and 1960s which Jane Jacobs called The Miniature Boom it explores how Conrad s models prompt broader scholarly questions about the nature of authorship in architecture the importance of craftsmanship and about the translation of architectural ideas between different media The book ultimately presents an alternative history of American modern architecture highlighting the often overlooked influence of architectural models and their makers Little Big House: Why, How, Who Glenn A. Ridler, 2017-05-22 Glenn A Ridler started physically erecting Little Big House in 1972 In 2005 he declared it complete The first edition of this book published in 2009 coincided with the exhibition A Chronicle Laying The Foundation of The House The Erection at the Little Big House Gallery It celebrated the contributions of the many friends and the family of Glenn Ridler who made the construction of the Little Big House possible This edition includes Ridler s story photographs of the construction reconstructed model and finished building as well as an essay by Morgan Ridler Ph D and a recent interview between Dr Ridler and Glenn Ridler on his development working process and newest work With the ongoing success of the Little Big House Gallery we are thrilled to present the second edition of Little Big House Why How Who **Model** Ladislav Kesner, 2015-08-04 **The Builder** ,1845 **Own Your Own Home** ,1928 **Review** Arthur Preuss, 1922 *Architect and Engineer of California* ,1907 *Architect* ,1872 A History of Architectural Modelmaking in Britain David Lund, 2022-12-16 Architectural modelmakers have long carried out their work hidden behind the scenes of architectural design and in presenting a history of architectural modelmaking in Britain for the first time this book casts a new light on their remarkable skills and achievements By telling the story of the modelmakers who make architectural models rather than

architects who commission and use them this book seeks to celebrate their often overlooked contribution to the success and endurance of the architectural model in Britain over the past one hundred and forty years Drawing from extensive archival research and interviews with practicing and retired modelmakers this book traces the complete history of architectural modelmaking in Britain from its initial emergence as a specialist occupation at the end of the nineteenth century through to the present day It reveals the legacy of John Thorp the first professional architectural modelmaker in Britain who opened his business in London in 1883 and charts the lives and careers of the innovative and creative modelmakers who followed him It examines the continually evolving materials tools and processes of architectural modelmaking and outlines the profound ideological economic and technological influences that have shaped the profession s development Illustrated with over one hundred photographs of architectural models from previously undocumented archives this book will be of great interest to architectural modelmakers academics and historians as well as anyone with an interest in architectural history and modelmaking

Riding with George Philip G. Smucker,2017-07-01 Long before George Washington was a president or general he was a sportsman Born in 1732 he had a physique and aspirations that were tailor made for his age one in which displays of physical prowess were essential to recognition in society At six feet two inches and with a penchant for rambunctious horse riding what he lacked in formal schooling he made up for in physical strength skill and ambition Virginia colonial society rewarded men who were socially adept strong graceful and fair at play Washington s memorable performances on the hunting field and on the battlefield helped crystallize his contribution to our modern ideas about athleticism and chivalry even as they also highlight the intimate ties between sports and war Washington s actions taken individually and seen by others as the core of his being helped a young nation bridge the old to the new and the aristocrat to the republican Author Philip G Smucker a fifth great grandnephew of George Washington uses his background as a war correspondent sports reporter and amateur

equestrian to weave an insightful tale based upon his own travels in the footsteps and hoofprints of Washington as a surveyor sportsman and field commander As often as possible he saddles up and charges off to see what Washington s woods byways and battlefields look like from atop a saddle Riding with George is boots in stirrups storytelling that unspools Washington s rise to fame in a never before told yarn It shows how a young Virginian s athleticism and Old World chivalry propelled him to become a model of right action and good manners for a fledgling nation

Journal of the Royal Institute of British Architects ,1927 *Model Britain* David Lund,2024-10-22 Throughout the twentieth century architectural models served as the miniature playgrounds in which the future of Britain s built environment was imagined and in drawing from the evidence provided by those models today this book considers how architects planners and civil engineers thought about that future by presenting a history of yesterday s dreams of tomorrow told through architectural models Focused not on the making of architectural models but rather the optimistic and utopian visions they were made to communicate this book examines the possible futures put forward by 120 models made by Thorp the oldest and most prolific firm of architectural modelmakers in Britain in order to reveal a century of evolving ideas about how we might live work relax and move From depictions of unbuilt city masterplans to those of seemingly ordinary shopping centres and motorways the models featured trace a progression of the architectural social political technological and

economic influences that shaped the design of Britain's buildings transport infrastructure and its towns and cities during a century of relentless change Illustrated with over 130 photographs this book will appeal to academics and historians as well as anyone with an interest in architectural models and the history of Britain's twentieth century built environment
