Airlines of the Jet Age R.E.G. Davies, 2016-08-24 Airlines of the Jet Age provides the first comprehensive history of the world s airlines from the early 1960s to the present day It begins with an informative introductory chapter on the infancy of flight and the development of air transport craft used during the First and Second World Wars and then wings into the first Jet Age the advent of jet airlines It continues through the second Jet Age of wide bodied aircraft such as the Boeing 747 and DC 10 and closes with the introduction of the third Jet Age which begins with the giant double decked Airbus A380 This reference book is an unparalleled reference for aviation buffs covering airlines around the globe and throughout the modern eras of human flight The last book written by renowned airline historian R E G Davies Airlines of the Jet Age is the ultimate resource for information and insight on modern air transport *Electric Airplanes and Drones* Kevin Desmond, 2018-09-14 Attempts at electric powered flight date to well before the 19th century Battery weight and low energy output made it impractical until the 1990s when the advent of lightweight materials more efficient solar power improved engines and the Li

Polymer lithium battery opened the skies to a wide variety of electric aircraft. The author describes the diverse designs of modern electric flying machines from tiny insect styled drones to stratospheric airships and explores developing trends including flying cars and passenger airliners. *Airline Competition in the Wake of the Proposed US Airways/United Merger* United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Antitrust, Business Rights, and Competition, 2001. *The World's Most Powerful Civilian Aircraft* Paul E. Eden, 2016-12-15. The World's Most Powerful Civilian Aircraft profiles many types from cargo transports and freighters through flying boats passenger airliners and business jets. Featured aircraft include the Ford Trimotor, Tin Goose, one of the great workhorses of early aviation history, the supersonic Tupolev Tu 144, Charger and Concorde, Cold War competitors in aviation excellence and the most popular passenger aircraft of the present including the Boeing 747 and Airbus A380. Each entry includes a brief description of the model's development and history, a profile view, key features and specifications. Packed with more than 200 artworks and photographs, this is a colorful guide for the aviation enthusiast.

Gotha Aircraft Andreas Metzmacher, 2021-12-02. The Gothaer Waggonfabrik (GWF) originally a German rail vehicle manufacturer entered the aircraft industry in 1913. The driving force behind this major change in production in this small Thuringian duchy in central Germany was a member of the British royal family. Gotha aircraft managed to make a name for themselves internationally. As with Fokker regarding fighter aircraft, the name Gotha is synonymous with German bomber aircraft of the Great War. Even successful seaplanes and the world's first asymmetric aircraft were a part of GWF's production at this time and lasted until the post-war Treaty of Versailles forced the abandonment of aircraft production. Aircraft could not be built in Gotha again until 1933. GWF did get development contracts for the Luftwaffe but they were essentially incidental side issues and not of the lucrative mass construction variety. In 1939 a world altitude record on the sports aircraft Gotha Go 150 provided GWF with a small though internationally significant highlight. During the war the GWF developed cargo gliders and under licence built the Messerschmitt Bf 110. In 1945 Gotha was supposed to undertake batch production of the flying wing jet fighter Horten Ho 229 and even designed its more radical successor. In 1954 the aircraft construction finally ended and once again the production consisted of gliders and one last proprietary design was created.

Time Briton Hadden, Henry Robinson Luce, 1929. **Aeronautical Industry**, 1928. **Flying Magazine**, 1939-02. *The Airplane* Louise Spilsbury, Richard Spilsbury, 2010-09. Examines the evolution of the airplane, its design and how planes affect today's world.

Naval Aviation News, 1970. **Airliners and Airways of Today** Sydney E. Veale, 1947. **Starting Something Big** Robert V. Garvin, 1998. Written by a former long time international manager of General Electric Company, this volume offers a history of the political and market forces affecting the engine industry, GE's role in the changes and how GE converted itself from military to commercial markets with conclusions drawn for potential investors in the industry. Powering the World's Airliners Reiner Decher, 2020-02-28. The first efforts of man to fly were limited by his ability to

generate sufficient power to lift a heavier than air machine off the ground Propulsion and thrust have therefore been the most fundamental elements in the development of aircraft engines From the simple propellers of the first airliners of the 1920s and 1930s to the turboprops and turbojets of the modern era the engines used in airliners have undergone dramatic development over a century of remarkable change These advances are examined in detail by aeronautical engineer and author Reiner Decher who provides a layman s guide to the engines that have and continue to power the aircraft which carry millions of travelers across millions of miles each year Reiner Decher also looks at the development of aero engines during the Second World War and how that conflict drove innovation He also explains the nature of wing design and how they provide lift and of the considerations of airflow over their surfaces from the early days of the twentieth century to the present To enable an easy understanding of this intriguing subject Powering the World s Airliners is profusely illustrated transporting readers back to the time of each major development and introducing them to the key individuals of the aero industry in each era After reading this comprehensive yet engaging story of the machines that power the aircraft in which we fly no journey will ever seem quite the same again
