Giant Of London From Air:

London's 'Big Bang' Moment and its Architectural Conversations Stephen Rosser, 2025-06-30 This book explores the topic of architecture as a component of public discourse focussing on the reception of four high profile developments in the City of London the UK capital s financial district dating from the final years of the twentieth century During this time the City s mode of operation culture and built environment were all transformed as a result of the market deregulation process labelled Big Bang It was also a period which saw the subject of architecture attracting public and media attention becoming a prominent feature of national conversation The book examines the extensive and often contentious discourse generated by the four case study projects It looks at how these projects were viewed and interpreted retrospectively when they had become part of the City s long and rich history Topics explored include building and urban form on the eve of the millennium the place of new development in a setting of unique historic importance the iconic building and celebrity architect and the role of then Prince Charles as an architectural critic Also referenced are many of the broader issues of the day including the Thatcher government policies and the preoccupations concerning London s infrastructure public realm inner city areas and inequalities Furthermore ranging across the discourse is the theme of the relationship between buildings and global finance foreshadowing later controversies concerning London s post millennial towers and their impact on the capital s skyline The book will be of interest to researchers and students of late twentieth century British architecture and urban development London s history and UK public discourse in the 1980s a decade of profound political economic and social change

When Giants Ruled the Sky John J. Geoghegan, 2021-10-29 Almost everything you know about airships is wrong Between 1917 and 1935 the US Navy poured tens of millions of dollars into their airship programme building a series of dirigibles each one more enormous than the last These flying behemoths were to be the future of long distance transport competing with trains and ocean liners to carry people post and cargo from country to country and even across the sea But by 1936 all these ambitious plans had been scrapped What happened *When Giants Ruled the Sky* is the story of how the

American rigid airship came within a hair's breadth of dominating long distance transportation. It is also the story of four men whose courage and determination kept the programme going despite the obstacles thrown in their way until the Navy deliberately ignored a fatal design flaw bringing the programme crashing back to earth. The subsequent cover up prevented the truth from being told for more than eighty years. Now for the first time what really happened can be revealed. *Young Marble Giants' Colossal Youth* Michael Blair, Joe Bucciero, 2017-05-04 Welsh post punk band Young Marble Giants released one LP in 1980 and then like their vanishing portraits on the album's cover disappeared. Even though *Colossal Youth* received positive reviews and sold surprisingly well, Young Marble Giants quickly slid into the margins of rock n roll history, relegated to cult status among post punk and indie rock fans. Their lasting appeal owes itself to the band's singular approach and response to punk rock. Instead of employing overt political ideology and abrasive sounds to rebel against the status quo, Young Marble Giants filled their songs with restraint, ambiguity and silence. The trio opened up their music to new sounds and ideas that redefined punk's rules of rebellion. Where did their rebellious ideas and impulses come from? By tracing *Colossal Youth's* artistic origins from Ancient Greece to the 20th century avant garde, Michael Blair and Joe Bucciero uncover the intricacies of Young Marble Giants' idiosyncratic take on music in the post punk age. Emerging from the gaps in between the notes are new ways of hearing the history of punk, the political and economic turbulence of the late 1970s and the world that surrounds us right now. **The Strand Magazine** George Newnes, 1921 *Domestic Engineering*, 1920

In 1919, in Newfoundland, four teams of aviators came from Britain to compete in the Big Hop, an audacious race to be the first to fly nonstop across the Atlantic Ocean. One pair of competitors was forced to abandon the journey halfway and two pairs never made it into the air. Only one team, after a death-defying sixteen hour flight, made it to Ireland. Celebrated on both continents, the transatlantic contest offered a surge of inspiration and a welcome distraction to a public

reeling from the Great War and the influenza pandemic But the seven airmen who made the attempt were quickly forgotten their achievement overshadowed by the solo Atlantic flights of Charles Lindbergh and Amelia Earhart years later In *The Big Hop* David Rooney grants the pioneering aviators of 1919 the spotlight they deserve From Harry Hawker the pilot who as a young man had watched Houdini fly over his native Australia to the engineer Ted Brown a US citizen who joined the Royal Flying Corps Rooney traces the lives of the unassuming men who performed extraordinary acts in the sky Mining evocative first person accounts and aviation archives Rooney also follows the participants journeys learning to fly on flimsy airplanes made of timber struts and varnished fabric surviving the bloodiest war that Europe had ever yet seen and battling faulty coolant systems severe storms and extreme fatigue while attempting the Atlantic Rooney transports readers to the world in which the great contest took place and traces the rise of aviation to its daredevil peak in the early decades of the twentieth century Recounting a deeply moving adventure *The Big Hop* explores why flights like these matter and why we take to the skies
