The Golden Age of Aviation is brought to life in this story of the giant Zeppelin airships that once roamed the sky a story that ended with the fiery destruction of the Hindenburg Genius a definitive tale of an incredible time when mere mortals learned to fly Keith O Brien The New York Times At the dawn of the twentieth century when human flight was still considered an impossibility Germany's Count Ferdinand von Zeppelin vied with the Wright Brothers to build the world's first successful flying machine As the Wrights labored to invent the airplane Zeppelin fathered the remarkable airship sparking a bitter rivalry between the two types of aircraft and their innovators that would last for decades in the quest to control one of humanity's most inspiring achievements And it was the airship not the airplane that led the way In the glittery 1920s the count's brilliant protégé Hugo Eckener achieved undreamed of feats of daring and skill including the extraordinary Round the World voyage of the Graf Zeppelin At a time when America's airplanes rickety deathtraps held together by glue screws and luck could barely make it from New York to Washington D C Eckener's airships serenely traversed oceans without a single crash fatality or injury What Charles Lindbergh almost died doing crossing the Atlantic in 1927 Eckener had effortlessly accomplished three years before the Spirit of St Louis even took off Even as the Nazis sought to exploit Zeppelins for their own nefarious purposes Eckener built his masterwork the behemoth Hindenburg a marvel of design and engineering Determined to forge an airline empire under the new flagship Eckener met his match in Juan Trippe the ruthlessly ambitious king of Pan American Airways who believed his fleet of next generation planes would vanquish Eckener's coming airship armada It was a fight only one man and one technology could win Countering each other's moves on the global chessboard each seeking to wrest the advantage from his rival the struggle for mastery of the air was a clash not only of technologies but of business diplomacy politics personalities and the two men's vastly different dreams of the future Empires of the Sky is the sweeping untold tale of the duel that transfixed the world and helped create our modern age

When Giants Ruled the Sky John J. Geoghegan, 2021-10-29 Almost everything you know about airships is wrong Between 1917 and 1935 the US Navy poured tens of millions of dollars into their airship programme building a series of dirigibles each one more enormous than the last These flying behemoths were to be the future of long distance transport competing with trains and ocean liners to carry people post and cargo from country to country and even across the sea But by 1936 all these ambitious plans had been scrapped What happened When Giants Ruled the Sky is the story of how the American rigid airship came within a hair's breadth of dominating long distance transportation It is also the story of four men whose courage and determination kept the programme going despite the obstacles thrown in their way until the Navy deliberately ignored a fatal design flaw bringing the programme crashing back to earth The subsequent cover up prevented the truth from being told for more than eighty

Barber, Paul T. Barber, 2012-01-02 Why were Prometheus and Loki envisioned as chained to rocks What was the Golden Calf Why are mirrors believed to carry bad luck How could anyone think that mortals like Perseus Beowulf and St George actually fought dragons since dragons don't exist Strange though they sound however these myths did not begin as fiction This absorbing book shows that myths originally transmitted real information about real events and observations preserving the information sometimes for millennia within nonliterate societies Geologists' interpretations of how a volcanic cataclysm long ago created Oregon's Crater Lake for example is echoed point for point in the local myth of its origin The Klamath tribe saw it happen and passed down the story for nearly 8 000 years We however have been literate so long that we've forgotten how myths encode reality Recent studies of how our brains work applied to a wide range of data from the Pacific Northwest to ancient Egypt to modern stories reported in newspapers have helped the Barbers deduce the characteristic principles by which such tales both develop and degrade through time Myth is in fact a quite reasonable way to convey important messages orally over many generations although reasoning back to the original events is possible only under rather specific conditions Our oldest written records date to 5 200 years ago but we have been speaking and mythmaking for perhaps 100
