The Ginger Man: The Complete and Unexpurgated Edition J. P. Donleavy, 1965 *Book Prices: Used and Rare, 1994* Edward N. Zempel, 1994 **Jubilee Hitchhiker** William Hjortsberg, 2012-04-01 Confident and robust Jubilee Hitchhiker is an comprehensive biography of late novelist and poet Richard Brautigan author of Troutfishing in America and A Confederate General from Big Sur among many others When Brautigan took his own life in September of 1984 his close friends and network of artists and writers were devastated though not entirely surprised To many Brautigan was shrouded in enigma erratic and unpredictable in his habits and presentation But his career was formidable an inspiration to young writers like Hjortsberg trying to get their start Brautigan s career wove its way through both the Beat influenced San Francisco Renaissance in the 1950s and the Flower Power hippie movement of the 1960s while he never claimed direct artistic involvement with either period Jubilee Hitchhiker also delves deeply into the spirited times in which he lived As Hjortsberg guides us through his search to uncover Brautigan as a man the reader is pulled deeply into the writer s world Ultimately this is a work that seeks to connect the Brautigan known to his fans with the man who ended his life so abruptly in 1984 while revealing the close ties between his writing and the actual events of his life Part history part biography and part memoir this etches the portrait of a man destroyed by his genius *Book Prices* Edward N. Zempel, Linda A. Verkler, 1993

Syncopations James Campbell, 2008-07-07 At a time when much literary criticism remains deliberately abstruse and unduly professionalized this book at once anecdotal and quietly argumentative feels like nothing so much as a fine collection of short stories about the most fascinating people you never met Morris Dickstein author of A Mirror in the Roadway To read this book is to watch the workings of a brilliant mind sharp quirky always ready to reimagine texts we thought we knew well and to shed light on others we might have passed over Campbell fits into no theoretical camp he is simply one of the rare critics on whom to cite Henry James nothing is lost Marjorie Perloff author of Wittgenstein s Ladder Rises above the usual divisions in American literature James Campbell is one of the most eloquent and consistently challenging writers on the British literary scene Caryl Phillips author of Dancing in the Dark **Midcontinent American Studies Journal**, 1967

The Unexpurgated Beaton Cecil Beaton, 2007-12-18 Cecil Beaton was one of the great twentieth century tastemakers A photographer artist writer and designer for more than fifty years he was at the center of the worlds of fashion society theater and film The Unexpurgated Beaton brings together for the first time the never before published diaries from 1970 to 1980 and unlike the six slim volumes of diaries published during his lifetime these have been left uniquely unedited Hugo Vickers the executor of Beaton s estate and the author of his acclaimed biography has added extensive and fascinating notes that are as lively as the diary entries themselves As one London reviewer wrote Vickers waspish footnotes are the salt on the side of the dish Beaton treated his other published diaries like his photographs endlessly retouching them but for this volume Vickers went back to the original manuscripts to find the unedited diaries Here is the photographer for British and American

The Idea of the Brain Matthew Cobb,2020-04-21 An elegant engrossing Carol Tavis Wall Street Journal examination of what we think we know about the brain and why despite technological advances the workings of our most essential organ remain a mystery I cannot recommend this book strongly enough Henry Marsh author of *No Harm* For thousands of years thinkers and scientists have tried to understand what the brain does Yet despite the astonishing discoveries of science we still have only the vaguest idea of how the brain works In *The Idea of the Brain* scientist and historian Matthew Cobb traces how our conception of the brain has evolved over the centuries Although it might seem to be a story of ever increasing knowledge of biology Cobb shows how our ideas about the brain have been shaped by each era's most significant technologies Today we might think the brain is like a supercomputer In the past it has been compared to a telegraph a telephone exchange or some kind of hydraulic system What will we think the brain is like tomorrow when new technology arises The result is an essential read for anyone interested in the complex processes that drive science and the forces that have shaped our marvelous brains **Authors in the News** Barbara Nykoruk,1976 A compilation of news stories and feature articles from American newspapers and magazines covering writers and other members of the communications media
