Nation's Agriculture ,1928 **Imperial Warlord** Rafe de Crespigny,2010-08-18 The warlord Cao Cao founder of the Three Kingdoms state of Wei is most commonly known through the romantic tradition of the novel *Sanguo yanyi* and other dramatic fictions which portray him as cruel and vicious In fact however Cao Cao was a fine strategist and politician who restored a measure of order after the political turmoil and civil war that brought the end of Han The present work offers a detailed account of Cao Cao's life and times using historical materials and the man's own words from official proclamations and personal poetry Exceptionally for such a distant time there is sufficient information in the texts to provide a rounded interpretation of one of the great characters of early China This title has been awarded the Stanislas Julien prize for 2011

special attention in a series of parallel chapters on their pantheons rituals sacred geography community organization canon formation impact on literature and recent archaeological discoveries This multi disciplinary approach without ignoring philosophical and theological issues brings into sharp focus the social and historical matrices of Chinese religion **Early Chinese Religion** John Lagerwey,Pengzhi Lü,2009-10-30 After the Warring States treated in Part One of this set there is no more fecund era in Chinese religious and cultural history than the period of division 220 589 AD During it Buddhism conquered China Daoism grew into a mature religion with independent institutions and together with Confucianism these three teachings having each won its share of state recognition and support formed a united front against shamanism While all four religions are covered Buddhism and Daoism receive special attention in a series of parallel chapters on their pantheons rituals sacred geography community organization canon formation impact on literature and recent archaeological discoveries This multi disciplinary approach without ignoring philosophical and theological issues brings into sharp focus the social and historical matrices of Chinese religion *The Early Chinese Empires* Mark Edward LEWIS,2009-06-30 In 221 B C the First Emperor of Qin unified what would become the heart of a Chinese empire whose major features would endure for two millennia In the first of a six volume series on the history of imperial China Lewis highlights the key challenges facing the court officials and scholars who set about governing an empire of such scale and diversity *The Measure of Civilization* Ian Morris,2014-02-23 A groundbreaking look at Western and Eastern social development from the end of the ice age to today In the past thirty years there have been fierce debates over how civilizations develop and why the West became so powerful The Measure of Civilization presents a brand new way of investigating these questions and provides new tools for assessing the long term growth of societies Using a groundbreaking numerical index of social development that compares societies in different times and places award winning author Ian Morris sets forth a sweeping examination of Eastern and Western development across 15 000 years since the end of the last ice age He offers surprising conclusions about when and why the West came to dominate the world and fresh perspectives for thinking about the twenty first century Adapting the United Nations approach for measuring human development Morris s index breaks social development into four traits energy capture per capita organization information technology and war making capacity and he uses archaeological historical and current government data to quantify patterns Morris reveals that for 90 percent of the time since the last ice age the world s most advanced region has been at the western end of Eurasia but contrary to what many historians once believed there were roughly 1 200 years from about 550 to 1750 CE when an East Asian region was more advanced Only in the late eighteenth century CE when northwest Europeans tapped into the energy trapped in fossil fuels did the West leap ahead Resolving some of the biggest debates in global history The Measure of Civilization puts forth innovative tools for determining past present and future economic and social trends *Imperial Institutions in Ancient Rome and Early China* Michael Loewe,Michael Nylan,T. Corey Brennan,2025-05-15 Written by the eminent sinologist Michael Loewe and edited for publication by T Corey

Brennan and Michael Nylan this book gives an overview of the considerations and practices of two major world empires that together ruled half of the earth's population in the first centuries BCE ancient Rome and Han China Approaching the historical material with a comparative perspective Loewe examines the strengths and weaknesses and the successes and failures which can be seen in the organisation and government of these two political systems Though each empire was largely ignorant of the other the problems they faced were similar given the rudimentary transportation and communication facilities of the time the high mortality rates and the low levels of literacy Yet each empire ruled its people in distinctly different ways with the Roman empire governed largely by military officials in contrast to the Chinese empire whose administration was well stocked with roughly 130 000 highly trained professionals The ten chapters of this book set out to compare the ways that these two contemporary regimes similar in size and population sought to control human activities and impose a set of regulated discipline over those who were ruled Each chapter concerns the degrees and methods of forming a united people the assumptions that lay behind such attempts the reliance that imperial authority placed on religious practices legal impositions and the structure of institutions and the bases of social cohesion and economic co operation The result is an engaging study of two remarkable empires whose rise and fall are contrasted in a way that deepens our understanding of empire and civilisation
