Case Studies of Emerging Farmers and Agribusinesses in South Africa Edward Mabaya, Krisztina Tihanyi, Mohammad Karaan, 2011-09-01 Emerging or black farmers are often considered a homogeneous group While individual emerging farmers and agribusinesses in South Africa share a common history the case studies in this book show that in fact significant

differences exist among them that are often hidden beneath the averaging and aggregation typical of most analytical research. Presenting fifteen case studies of emerging agribusinesses in South Africa, this book has three main objectives: 1 to capture the human stories behind the emerging farms and agribusinesses in South Africa in order to showcase their rich diversity, historical backgrounds, current context and future directions; 2 to highlight the best practices, opportunities and challenges facing South Africa's emerging farmers and agribusinesses; and 3 to create a new set of instructional materials for academics and development practitioners or as a point of reference for other entrepreneurs, members of government and other practitioners engaged in agriculture and agribusiness. The case study format, a relatively new tool in the field of agribusiness management, allows for a close-up view of the entrepreneurs at the heart of the businesses, providing an ideal lens through which to take a snapshot of the agribusiness landscape of South Africa today.

World Fish Farming: Cultivation and Economics E. Brown, 2012-12-06. Until the First Edition of *World Fish Farming: Cultivation and Economics* was published several years ago, there was little or no economic and technical information on commercial aquaculture, either by countries or by species. I tried at that time to partially fill the gap in the literature. In this Second Edition, I have updated data originally presented and increased the scope by adding new countries. New trout data have been added for 10 western European countries; sections on cost of production of food-sized catfish and fingerlings in the USA; new and improved chapters for Japan, Hungary, Indonesia, the Philippines and the United Kingdom; and completely new chapters pertaining to Poland, Thailand and Czechoslovakia have all been added to this edition. The book now includes 31 countries, including all major producing ones. Between 5.5 and 6.0 million metric tons of finfish, shrimp and crayfish cultured production are represented, which accounts for about 90% of the world's total. The People's Republic of China and the USSR, as well as countries on the continents of Europe, Asia, North America and Oceania, are represented. Because of only minimal reported cultured fish production in Africa and South America, these continents have been omitted. Also, according to information received from New Zealand, there is no culturing of fish in that country other

than for restocking of public waters More than 100 species of cultured fish seven species of shrimp and prawns and six species of crayfish are discussed
