Hand und Wort. Andre Leroi-Gourhan, 1985-01 **GenEthics** Kurt Bayertz, 1994 An analysis of the ethical controversies surrounding technological intervention in human reproduction Hand und Wort André Leroi-Gourhan, Michael Bischoff, 2006 *The Cultural Life of Money* Isabel Capeloa Gil, Helena Gonçalves da Silva, 2015-07-01 The book discusses how culture simultaneously shapes and is shaped by the economy Over the past few years as the world has staggered from one financial crisis to another the neat separation of economics and culture has been consistently challenged To understand the current state of affairs it has become increasingly necessary to understand the conjuncture that rules the production of value in economic systems how money shapes social relations and affects discursive practices By discussing the vocabulary by understanding the rhetoric and interpreting the narratives be it of crisis austerity growth welfare neo liberalism or socialism new modes of imaging the economic system may be made possible The book is structured in four chapters dealing with theory and conjuncture Philosophies of Money with the visual arts and investment The Arts and Finance with literary representation and narrativity Literature and Money Matters and with the cognitive impact of fiduciary representation Cognitive Moneyscapes This collection analyses the process whereby a material icon invested with the symbolical power to rule social exchange becomes an explanatory narrative determining the way societies produce meaning , **Interrogations of Evolutionism in German Literature 1859-2011** Nicholas Saul, 2021-02-08 Darwin's idea has been called the best idea anyone ever had In *Interrogations of Evolutionism in German Literature 1859-2011* Nicholas Saul offers the first representative account of German literary responses to Darwinian evolutionism from Raabe and Jensen via Ernst Jünger and Botho Strauß to Dietmar Dath Often identified with National Socialist ideology and hence notably absent from the public sphere after 1945 Darwinian thought is in fact shown to be distorted through the lens of Social Darwinism and bionationalist organicism As Nicholas Saul shows literature has been the main agent in public discourse for challenging such illiberal presentations and there is a common thread of salvific individualism which leads to the new legitimacy of Darwinian discourse today **Concepts and Approaches in Evolutionary Epistemology** Franz M. Wuketits, 2012-12-06 The present volume brings together current interdisciplinary research which adds up to an evolutionary theory of human knowledge Le evolutionary epistemology It comprises ten papers dealing with the basic concepts approaches and data in evolutionary epistemology and discussing some of their most important consequences Because I am convinced that criticism if not confused with mere polemics is apt to stimulate the maturation of a scientific or philosophical theory I invited Reinhard Low to present his critical view of evolutionary epistemology and to indicate some limits of our evolutionary conceptions The main purpose of this book is to meet the urgent need of both science and philosophy for a comprehensive up to date approach to the problem of knowledge going beyond the traditional disciplinary boundaries of scientific and philosophical thought Evolutionary epistemology has emerged as a naturalistic and science oriented view of

knowledge taking cognizance of and compatible with results of biological psychological anthropological and linguistic inquiries concerning the structure and development of man's cognitive apparatus Thus evolutionary epistemology serves as a frame work for many contemporary discussions of the age old problem of human knowledge

The Ethics of Today's Science and Technology Wenchao Li,Hans Poser,2008 Beneath the discussion and clarification of problems of which both sides agreed to have them in common and which are documented in this volume one of the important insights on both sides had been disagreements depending on a different way in seeing articulating and reflecting on these problems So the English term science in differing from the German Wissenschaft which includes not only sciences of nature but also humanities is meant in the Western tradition as the uninterested research for truth especially for most general laws but the Chinese understanding seems to be characterized by an immediate connection of science and its practical use

Tales That Touch Bettina Brandt,Yasemin Yildiz,2022-09-20 Cultural texts born out of migration frequently defy easy categorization as they cross borders languages histories and media in unpredictable ways Instead of corralling them into identity categories whether German or otherwise the essays in this volume building on the influential work of Leslie A

Historico-genetic Theory of Culture Günter Dux, 2014-03-15 The book focuses on the modern understanding of human life forms as constructs that followed an evolutionary history The author thus finds science confronted with two questions firstly how the transgression of the virtual threshold between natural and cultural history was possible secondly how the socio cultural constructs were able to develop in the course of history the way they did The discussion concentrates on the problem of determining a processual logic in the development of societal structures as well as in the development of cognition The focus of attention is the historico genetic reconstruction of cognition The book was originally published in German as *Historisch genetische Theorie der Kultur* Weilerswist 2000 Velbr ck *Eingreifen und Begreifen* Jörn Münkner, 2008
