The Heredity Hoax Richard M. Lerner, Gary Greenberg, 2025-01-30 This innovative and thought provoking book integrates both new authored material and reprints of existing literature that together provide a compelling narrative that reveals the fatally flawed science associated with genetic reductionist accounts of human behavior and development. Through an interdisciplinary lens it illuminates the dynamic nature of human development, empowering readers to question established notions and embrace the complexity of our potential. Across the book the work of top tier scientists from developmental, comparative, educational, and biological science illuminates theory and research converging on the conclusion that the multiple egregiously flawed work of genetic reductionists should be expunged from research pertinent to human development. The book challenges the prevailing reductionist narratives and their application to social policies, programs, and uses in media. Theoretically based and empirically rigorous, this multidisciplinary approach to human development will shine a light on the inequities in individuals or groups that suggest that specific genes do not enable them to succeed in life. The Heredity Hoax invites graduate programs and advanced undergraduate courses on human development, human potential, epigenetics, and more to delve into the intricate interplay between genes, environment, and personal growth. This will also serve as an unimpeachable source of evidence for researchers, educators, and social policymakers.

Clinical Education for the Health Professions Debra Nestel, Gabriel Reedy, Lisa McKenna, Suzanne Gough, 2023-07-19 This book compiles state of the art and science of health professions education into an international resource showcasing expertise in many and varied topics. It aligns profession specific contributions with inter professional offerings and prompts readers to think deeply about their educational practices. The book explores the contemporary context of health professions education, its philosophical and theoretical underpinnings, whole of curriculum considerations, and its support of learning in clinical settings. In specific topics it offers approaches to assessment, evidence based educational methods, governance, quality improvement, scholarship, and leadership in health professions education, and some forecasting of trends and practices. This book is an invaluable resource for students, educators, academics, and anyone interested in health professions education.

Modeling Contextual Effects in Longitudinal Studies Todd D. Little, James A. Bovaird, Noel A. Card, 2007-03-21 Modeling the impact and influence of contextual factors on human development is something that many talk about but few actually do. The goal of this book is to provide researchers with an accessible guide to understanding the many different ways that contextual factors can be including in longitudinal studies of human development.
