**Administration** Rachel S. Blechman, Norma M. Goonen, 1999-11-30 Goonen and Blechman provide an analysis useful as a desk reference or as a text for practicing and prospective administrators and university counsel They examine the legal points ethical questions and practical steps an administrator or university counsel should be aware of in dealing with some of

the most frequently encountered issues in the administration of a college university or other postsecondary institution Each chapter targets a selected area of academic affairs and the format includes four sections legal parameters ethical considerations practical suggestions and an illustrative case Hiring issues compensation and employment issues promotion and tenure terminations non renewals and reductions in force academic freedom student disputes on academic matters and transcript and degree issues are all analyzed Goonen and Blechman provide a general guide that can be readily utilized and understood by those without specific prior training in the law or in higher education administration The discussions and information the guide contains will be valuable to current and prospective practitioners as they seek to balance the legal ethical and practical issues that surface in every decision in the increasingly complex higher education arena Thriving in an Academic Career Michael Solem, Kenneth Foote, Shannon O'Lear, LaToya Eaves, Jongwon Lee, 2024-12-30 This book provides an invaluable guide on how to achieve a successful and fulfilling academic career Academics must balance multiple roles and responsibilities between teaching research and offering services to the department university and broader community This book provides practical research based guidance on how to adopt a healthy and balanced perspective that accounts for these interconnections Research shows that faculty who achieve early balance in their academic responsibilities and home life are more likely to succeed in all aspects of their career while strengthening the quality and climate of their programs and campuses This book's chapters accordingly feature case studies and examples that dig deeper into strategies and principles of holistic and balanced career practice and planning This book assists readers in understanding the relationships between their individual talents as teachers and scholars the obligations of their department as a community nested with others contributing to the university mission and the role and responsibility of their university and discipline in the wider society The themes of balance and harmony underpin this book's approach to faculty development Thriving in an Academic Career is for anyone beginning their academic career in geography and related social and environmental sciences at all types of higher education institutions This book will be of particular interest to graduate students and early career faculty in geography and nearby social environmental and natural sciences **Tools for Teaching** Barbara Gross Davis, 2009-07-17 This is the long awaited update on the bestselling book that offers a practical accessible reference manual for faculty in any discipline This new edition contains up to date information on technology as well as expanding on the ideas and strategies presented in the first edition It includes more than sixty one chapters designed to improve the teaching of beginning mid career or senior faculty members The topics cover both traditional tasks of teaching as well as broader concerns such as diversity and inclusion in the classroom and technology in educational settings Preparing for College and University Teaching Joanna Gilmore, Molly Hatcher, 2023-07-03 This book is a guide for designing professional development programs for graduate students The teaching competencies framework presented here can serve as the intended curriculum for such programs The book will also be an excellent resource for evaluating programs and will be an

excellent resource for academics who study graduate students This book presents the work of the Graduate Teaching Competencies Consortium to identify organize and clarify the competencies that graduate students need to teach effectively when they join the professoriate To achieve this goal the Consortium developed a framework of 10 teaching competencies organized around three overarching questions What do graduate students need to achieve by the end of their graduate education to be successful teacher scholars What do graduate students need to understand about higher education to have successful careers as educators What do graduate students need to do to be successful teachers during their graduate student careers Although much work has been done to identify the competencies of effective teachers in higher education only a small portion of this work has been conducted with graduate student instructors This is an important area of research given that graduate students are critical in the higher education academic pipeline Nationally graduate students teach between 25% and 50% of courses offered at the undergraduate level Graduate student teaching is also critical because during early teaching experiences teachers establish a teaching style and set of teaching skills which will endure as graduate students enter the professoriate It is important to develop a teaching competency framework that is specific to graduate student instructors as they often have unique needs and roles as teachers For example graduate student instructors are in the unique position of becoming experts in their field concurrent with learning to teach Moreover as many professional development programs for graduate student instructors evolve based upon factors such as available resources and perceived needs of graduate students this framework will be a useful aid for thoughtfully designing strategic evidence based comprehensive professional development opportunities and programs
