**Handbook of Crisis Counseling, Intervention, and Prevention in the Schools** Jonathan Sandoval, 2002 *Crisis Counseling, Intervention and Prevention in the Schools* Jonathan Sandoval, 2013-03-05 Since the first edition was published in 1988 the role of crisis intervention and prevention has become central to mental health professionals working in the schools. Disasters such as hurricane Katrina, terrorist attacks both in this country and around the world, and various school shootings have greatly increased school crisis research and policy development. This book is designed for an introductory graduate course taken by students in school psychology, school counseling, and school social work. Section I provides a crisis response overview; section II deals with crises for children and adolescents; and section III covers crises that manifest in adolescence. Discussions of the 16 most prevalent types of crises are covered in sections II and III and include their characteristics, causes, interventions, and preventive programs. All chapters will be updated, six heavily revised, or totally rewritten by new authors, and two new chapters, chapters 8 and 19, have been added.

**The School Services Sourcebook** Cynthia Franklin, Mary Beth Harris, Paula Allen-Meares, 2006-02-02 This comprehensive sourcebook covers every aspect of school service delivery, arming practitioners with the nuts and bolts of evidence-based practice. Each of the 114 chapters serves as a detailed intervention map, beginning with a summary of the problem area and moving directly into step-by-step instructions on how to implement an evidence-based program with distinct goals in mind and methods to measure the outcome. School-based professionals in need of ready access to information on mental health disorders, developmental disabilities, health promotion, child abuse, dropout prevention, conflict resolution, crisis intervention, group work, family interventions, culturally competent practice, policy, ethics, legal issues, community involvement, accountability, and funding can now find high-quality and easy-to-implement strategies at their fingertips. A concise, user-friendly format orients readers to each issue with a Getting Started section, then moves smoothly into What We Know, What We Can Do, Tools and Practice Examples, and Points to Remember. Quick reference tables and charts highlight the most important information needed for daily reference, and lists of further reading and Web resources guide readers in gathering additional information to tailor their practice to suit their students' needs. Each chapter has been specifically crafted by leaders in their fields with the ultimate goal of giving school-based practitioners the tools they need to deliver the best mental health and social services possible to students, families, and communities. This is a must-have reference for all school-based social workers, psychologists, counselors, mental health professionals, and educators.

*Helping Victims of Violent Crime* Diane L. Green, Albert R. Roberts, 2008-06-23 Over the past two decades, violent crime has become one of the most serious domestic problems in the United States Approximately 13 million people, nearly 5% of the U.S. population, are victims of crime every year and of that, approximately one and a half million are victims of violent crime Ensuring quality of life for victims of crime is therefore a major challenge facing policy makers and mental health providers Helping Victims of Violent Crime grounds victim assistance treatments in a victim-centered and strengths perspective The book explores victim assistance through systems theory, the holistic notion of examining the client in his/her environment and a key theoretical underpinning of social work practice The basic assumption of systems theory is homeostasis A crime event causes a change in homeostasis and often results in disequilibrium The victim's focus at this point is to regain equilibrium Under the systems metatheory, coping, crisis and attribution theories provide a good framework for victim-centered intervention Stress and coping theories posit that three factors determine the state of balance: perception of the event, available situational support and coping mechanisms Crisis theory offers a framework to understand a victim's response to a crime The basic assumption of crisis theory asserts that when a crisis occurs, people respond with a fairly predictable

physical and emotional pattern The intensity and manifestation of this pattern may vary from individual to individual Finally attribution theory asserts that individuals make cognitive appraisals of a stressful situation in both positive and negative ways These appraisals are based on the individual's assertion that they can understand predict and control circumstances and result in the victim's assignment of responsibility for solving or helping with problems that have arisen from the crime event In summary these four theories can delineate a definitive model for approach to the victimization process It is from this theoretical framework that *Treating Victims of Violent Crime* offers assessments and interventions with a fuller understanding of the victimization recovery process The book includes analysis of victims of family violence child abuse elder abuse partner violence as well as stranger violence sexual assault homicide and terrorism
