Handbook of Development Economics. Vol. 3B Hollis B Chenery,1995 **Development Economics** Yujiro

Hayami,Yoshihisa Godo,2005-02-03 Presbyterian minister John Witherspoon was a key figure politically and religiously in the formative years of the United States In this fresh account of Witherspoon s thought L Gordon Tait focuses on Witherspoon s piety the way Witherspoon believed that the Christian faith should take visible and practical form in ministry politics and everyday obedience and devotion The Piety of John Witherspoon is filled with photographs from Witherspoon s life and Tait s comprehensive treatment of Witherspoon makes a significant contribution to the understanding of his impact on church education and society **Development Economics** Debraj Ray,1998-01-12 A landmark textbook on development economics The study of development in low income countries is attracting more attention around the world than ever before Yet until now there has been no comprehensive text that incorporates the recent huge strides made in the subject Development Economics does precisely that in a clear rigorous and elegant fashion Debraj Ray one of the most accomplished theorists in development economics today presents in this book a synthesis of recent and older literature in the field and raises important questions that will help to set the agenda for future research He covers such vital subjects as theories of economic growth economic inequality poverty and undernutrition population growth trade policy and the markets for land labor and credit A common point of view underlies the treatment of these subjects that much of the development process can be understood by studying factors that impede the efficient and equitable functioning of markets Diverse topics such as the new growth theory moral hazard in land contracts information based theories of credit markets and the macroeconomic implications of economic inequality come under this common methodological umbrella The book takes the position that there is no single cause for economic progress but that a combination of factors among them the improvement of physical and human capital the reduction of inequality and institutions that enable the background flow of information essential to market performance consistently favor development Ray supports his arguments throughout with examples from around the world The book assumes a knowledge of only introductory economics and explains sophisticated concepts in simple direct language keeping the use of mathematics to a minimum Development Economics will be the definitive textbook in this subject for years to come It will prove useful to researchers by showing intriguing connections among a wide variety of subjects that are rarely discussed together in the same book And it will be an important resource for policy makers who increasingly find themselves dealing with complex issues of growth inequality poverty and social welfare **The Determinants of Economic Growth** Maaïke S. Oosterbaan,Thijs de Ruyter van Steveninck,Nico van der Windt,2012-12-06 Determinants of economic growth An overview Thijs de Ruyter van Steveninck Nico van der Windt and Maaïke Oosterbaan Netherlands Economic Institute What causes economic growth Why have some countries grown much faster than others Why do some countries not grow at all or

even experience negative per capita growth rates What can governments do to raise the growth rates of their country These questions were discussed at a conference on March 23 and 24 1998 organized by the Netherlands Economic Institute NEI on behalf of the Netherlands Ministry of Foreign Affairs This book contains the proceedings of the conference Economic growth is widely considered as a necessary though not sufficient condition for poverty alleviation During the past two decades scholars and researchers have found a renewed interest in thinking about economic growth and advances in the understanding of economic growth have taken place On the one hand the theoretical understanding of growth has progressed on various fronts including endogenous technological innovation and increasing returns to scale the interaction of population fertility human capital and growth international spill overs in technology and capital accumulation and the role of institutions On the other hand the increasing availability and use of data sets has given a large incentive to empirical research on cross country growth following the path breaking work of Barro 1991

Agricultural Land Redistribution Hans P. Binswanger-Mkhize, Camille Bourguignon, Rogerius Johannes Eugenius van den Brink, 2009-01-01 Despite 250 years of land reform all over the World important land inequalities remain especially in Latin America and Southern Africa While in these countries there is near consensus on the need for redistribution much controversy persists around how to redistribute land peacefully and legally often blocking progress on implementation This book focuses on the how of land redistribution in order to forge greater consensus among land reform practitioners and enable them to make better choices on the mechanisms of land reform Reviews and case studies describe and analyze the al

How Does the Composition of Public Spending Matter? Stefano Paternostro, Anand Rajaram, Erwin R. Tiongson, 2005

The Idea of Poverty Paul Spicker, 2007-01-10 Paul Spicker examines views about what poverty is and what should be done about it Poverty means many different things to different people for example lack of money or dependency on benefits Here he makes an argument for a participative inclusive understanding of the term

Welfare Economics Y. Ng, 2003-12-19 Yew Kwang Ng looks to make welfare economics more

complete by discussing the recent inframarginal analysis of division of labour and by pushing welfare economics from the level of preference to that of happiness making a reformulation of the foundation of public policy necessary A theory of the third best is provided with extension to the equality efficiency issue The remarkable conclusion of treating a dollar as a dollar provides a powerful simplification of public policy formulation in general and in cost benefit analysis in particular

Seasonal Hunger and Public Policies Shahidur R. Khandker, Wahiduddin Mahmud, 2012-07-10 The book provides an exhaustive inquiry of Bangladesh's seasonal hunger with special focus on the northwest region where it is more pronounced than in other areas It also presents an evaluation of several policy interventions launched recently in mitigating seasonality

Land Rental Markets as an Alternative to Government Reallocation? Klaus W. Deininger, Songqing Jin, 2002

The Land Governance Assessment Framework Klaus Deininger, Harris Selod, Anthony Burns, 2012 Increased global demand for land posits the need for well designed country level land policies to protect long held rights facilitate land access and address any constraints that land policy may pose for broader growth While the implementation of land reforms can be a lengthy process the need to swiftly identify key land policy challenges and devise responses that allow the monitoring of progress in a way that minimizes conflicts and supports broader development goals is clear The Land Governance Assessment Framework LGAF makes a substantive contribution to the land sector by providing a quick and innovative tool to monitor land governance at the country level The LGAF offers a comprehensive diagnostic tool that covers five main areas for policy intervention Legal and institutional framework Land use planning management and taxation Management of public land Public provision of land information and Dispute resolution and conflict management The LGAF assesses these areas through a set of detailed indicators that are rated on a scale of pre coded statements from lack of good governance to good practice While land governance can be highly technical in nature and tends to be addressed in a partial and sporadic manner the LGAF posits a tool for a comprehensive assessment taking into account the broad range of issues that land governance encompasses while enabling those unfamiliar with land to grasp its full complexity The LGAF will make it possible for policymakers to make sense of the technical levels of the land sector benchmark governance identify areas that require further attention and monitor progress It is intended to assist countries in prioritizing reforms in the land sector by providing a holistic diagnostic review that can inform policy dialogue in a clear and targeted manner In addition to presenting the LGAF tool this book includes detailed case studies on its implementation in five selected countries Peru the Kyrgyz Republic Ethiopia Indonesia and Tanzania

Managing Currency Crises in Emerging Markets Michael P. Dooley, Jeffrey A. Frankel, 2007-11-01 The management of financial crises in emerging markets is a vital and high stakes challenge in an increasingly global economy For this reason it's also a highly contentious issue in today's public policy circles In this book leading economists many of whom have also participated in policy debates on these issues consider how best to reduce the frequency and cost of such crises The contributions here explore the management process from the beginning of a crisis to

the long term effects of the techniques used to minimize it The first three chapters focus on the earliest responses and the immediate defense of a currency under attack exploring whether unnecessary damage to economies can be avoided by adopting the right response within the first few days of a financial crisis Next contributors examine the adjustment programs that follow considering how to design these programs so that they shorten the recovery phase encourage economic growth and minimize the probability of future difficulties Finally the last four papers analyze the actual effects of adjustment programs asking whether they accomplish what they are designed to do and whether as many critics assert they impose disproportionate costs on the poorest members of society Recent high profile currency crises have proven not only how harmful they can be to neighboring economies and trading partners but also how important policy responses can be in determining their duration and severity Economists and policymakers will welcome the insightful evaluations in this important volume and those of its companion Sebastian Edwards and Jeffrey A Frankel s *Preventing Currency Crises in Emerging Markets* **incentives, supervision, and sharecropper productivity** Hanan G. Jacoby,2007 Capacity Realization and Productivity Growth in a Developing Country Ruhul A. Salim,2018-12-14 First published in 1999 Firms in manufacturing industries are influenced by the market oriented liberalization reform policies in many developing countries since the late eighties However studies applying appropriate methodology to appropriate data seldom analyze the impact of reforms on the performance of production units such as manufacturing firms The central point of this book is to address this issue by comparing firms achievement with best practice performance before and after reforms This form of analysis is not new but it emphasizes a new focus or realignment of thinking within neoclassical economics to develop an analytical framework This book examines the productivity growth of Bangladesh manufacturing firms as component measures of changes in capacity realization and technical progress The significant feature of this approach is that it allows for the inefficiency of firms and thus productivity growth is estimated rather than taking it as a residual as is usually measured in the traditional growth accounting approach High rates of technological progress on the one hand can co exist with low rates of capacity realization On the other hand relatively low rates of technological progress can co exist with an improving capacity realization As a result specific policy actions are required to address the difference in the sources of variation in productivity In this respect this book would provide invaluable insights for policy makers development practitioners academics and students of economics Food Security and Sociopolitical Stability Christopher B. Barrett,2013-09-26 Global food price spikes in 2008 and again in 2011 coincided with a surge of political unrest in low and middle income countries Angry consumers took to the streets in scores of nations In some places food riots turned violent pressuring governments and in a few cases contributed to their overthrow Foreign investors sparked a new global land rush adding a different set of pressures With scientists cautioning that the world has entered a new era of steadily rising food prices perhaps aggravated by climate change the specter of widespread food insecurity and sociopolitical instability weighs on policymakers worldwide

In the past few years governments and philanthropic foundations began redoubling efforts to resuscitate agricultural research and technology transfer as well as to accelerate the modernization of food value chains to deliver high quality food inexpensively faster and in greater volumes to urban consumers But will these efforts suffice This volume explores the complex relationship between food security and sociopolitical stability up to roughly 2025 Organized around a series of original essays by leading global technical experts a key message of this volume is that actions taken in an effort to address food security stressors may have consequences for food security stability or both that ultimately matter far more than the direct impacts of biophysical drivers such as climate or land or water scarcity The means by which governments firms and private philanthropies tackle the food security challenge of the coming decade will fundamentally shape the relationship between food security and sociopolitical stability

Social Welfare in India and China Jianguo Gao,Rajendra Baikady,Lakshmana Govindappa,Sheng-Li Cheng,2020-09-01 Focusing on social work and social service delivery this book examines the social policies and programmes designed to address different societal issues and concerns across India and China It focuses on gaining understanding of design and delivery of social welfare policies related to special interest groups highlighting important contemporary challenges such as child labour child abuse exploitation of women problems related to disabled people mental health issue illiteracy and unemployment Offering a comparative perspective the book considers the impact of political administration in both countries to critically assess key issues related to social welfare in two different political economic social and cultural contexts
