Morphology and Meaning** R. Frost, Marian Katz, 1992-10-20 The area of research on printed word recognition has been one  
of the most active in the field of experimental psychology for well over a decade However notwithstanding the energetic  
research effort and despite the fact that there are many points of consensus major controversies still exist This volume is  
particularly concerned with the putative relationship between language and reading It explores the ways by which  
orthography phonology morphology and meaning are interrelated in the reading process Included are theoretical discussions  
as well as reviews of experimental evidence by leading researchers in the area of experimental reading studies The book  
takes as its primary issue the question of the degree to which basic processes in reading reflect the structural characteristics  
of language such as phonology and morphology It discusses how those characteristics can shape a language s orthography  
and affect the process of reading from word recognition to comprehension Contributed by specialists the broad ranging mix  
of articles and papers not only gives a picture of current theory and data but a view of the directions in which this research  
area is vigorously moving
