## **Liberation Theology At The Crossroads Democracy Or Revolution:**

*Liberation Theology at the Crossroads* Paul E. Sigmund, 1992-09-03 Liberation theology originated in Catholic Latin America at the end of the 1960s in response to prevalent conditions of poverty and oppression Its basic tenet was that it is the primary duty of the church to seek to promote social and economic justice Since that time it has grown in influence spreading to other areas of the Third World along with bitter controversy about its ties to Marxist ideology and violent revolution Drawing on both English and Spanish sources this critical study examines the history method and doctrines of liberation theology Sigmund considers the movement s origins in political circumstances in Latin America and provides case studies of its role in such events as the revolution and counter revolution in Chile and in the revolutionary movements in El Salvador and Nicaragua Examining the thought of major liberation theologians as well as the critical responses of the Vatican Sigmund shows that liberation theology is a complex phenomenon comprising a variety of kinds and degrees of radicalism He discerns a general trend away from the Marxist rhetoric that has often characterized the movement in the past and towards the kind of grassroots populist reform typified by the Basic Christian Communities Movement

*The Future of Liberation Theology* Ivan Petrella, 2017-03-02 The Future of Liberation Theology envisions a radical new direction for Latin American liberation theology One of a new generation of Latin American theologians Ivan Petrella shows that despite the current dominance of end of history ideology liberation theologians need not abandon their belief that the theological rereading of Christianity must be linked to the development of historical projects models of political and economic organization that would replace an unjust status quo In the absence of historical projects liberation theology currently finds itself unable to move beyond merely talking about liberation toward actually enacting it in society Providing a bold new interpretation of the current state and potential future of liberation theology Ivan Petrella brings together original research on the movement with developments in political theory critical legal theory and political economy to reconstruct liberation theology s understanding of theology democracy and capitalism The result is the recovery of historical projects thus allowing liberation theologians to once again place the reality of liberation and not just the promise at the forefront of their task

[Religion in America Since 1945](#) Patrick Allitt, 2003-12-17 Moving far beyond the realm of traditional church history Patrick Allitt here offers a vigorous and erudite survey of the broad canvas of American religion since World War II Identifying the major trends and telling moments within major denominations and also in less formal religious movements he asks how these religious groups have shaped and been shaped by some of the most important and divisive issues and events of the last half century the Cold War the Civil Rights Movement the Vietnam War feminism and the sexual revolution abortion rights the antinuclear and environmentalist movements and many others Allitt argues that the boundaries between religious and political discourse have become increasingly blurred in the last fifty years Having been divided along denominational lines in the early postwar period religious Americans had come by the 1980s to be divided along political lines instead as they grappled with the

challenges of modernity and secularism Partly because of this politicization and partly because of the growing influence of Asian Latino and other ethnic groups the United States is anomalous among the Western industrialized nations as church membership and religious affiliation generally increased during this period Religion in America Since 1945 is a masterful analysis of this dynamism and diversity and an ideal starting point for any exploration of the contemporary religious scene

Seek the Peace of the City Richard Bourne,2009-10-01 Seek the Peace of the City provides a robust engagement with the theological foundations and practices of Christian social and political criticism Richard Bourne identifies a theological realism found in the work of John Howard Yoder This realism bases social and political criticism in the purposes of a nonviolent patient and reconciling God Bourne develops this account and shows how it is consonant with aspects of the work of a range of contemporary theologians including Stanley Hauerwas John Milbank Karl Barth and Dietrich Bonhoeffer In developing this theological realism the book furnishes an account of Christian criticism capable of addressing key debates in contemporary theology and political theory Bourne begins by arguing for the public status of theological political claims He demonstrates that only a vigorous theological realism grounded in the universal lordship of Christ is capable of providing a foundation for local particular and ad hoc practices of critique The book concludes by developing an account of the impact such a theological realism and practice of critique might have on contemporary political theory with explorations of the doxological nature of social change the changing shape of the state governmentality and political sovereignty and the status and role of religious communities in civil society Paulo Freire and the Cold War Politics of Literacy Andrew J.

**Human Rights and Transnational Solidarity in Cold War Latin America** Jessica Stites Mor, 2013-03-29 With the end of the global Cold War the struggle for human rights has emerged as one of the most controversial forces of change in Latin America Many observers seek the foundations of that movement in notions of rights and models of democratic institutions that originated in the global North Challenging that view this volume argues that Latin American community organizers intellectuals novelists priests students artists urban pobladores refugees migrants and common people have contributed significantly to new visions of political community and participatory democracy These local actors built an alternative transnational solidarity from below with significant participation of the socially excluded and activists in the global South Edited by Jessica Stites Mor this book offers fine grained case studies that show how Latin America's re-emerging Left transformed the struggles against dictatorship and repression of the Cold War into the language of anti colonialism socioeconomic rights and identity

*Let Justice Roll* Neal Riemer, 1996 Written by prominent scholars from a wide range of disciplines this diverse collection of essays discusses the contemporary relevance of the prophetic mode and challenges in the areas of religion politics and society The contributors critically investigate the creative interaction between the religious and secular domains and explain how the prophetic mode can provide solutions to pressing problems such as war oppression poverty hunger and discrimination The essays explore possibilities of achieving an integration of prophetic ethics social scientific understanding and democratic and constitutional statecraft and they describe how the prophetic mode currently manifests itself in political philosophy history religion and literature

**Priest Under Fire** Peter M. Sánchez, 2015-12-09 Through interviews with David Rodriguez and a good helping of critical historical context Sanchez illustrates the extent to which some religious leaders played pivotal roles in the popular movement of El Salvador's political crisis of the 1970s and 1980s

**Utopia Unarmed** Jorge G. Castañeda, 2012-06-27 Castro's Cuba is isolated the guerrillas who once spread havoc through Uruguay and Argentina are dead dispersed or running for office as moderates And in 1990 Nicaragua's Sandinistas were rejected at the polls by their own constituents Are these symptoms of the fall of the Latin American left Or are they merely temporary lulls in an ongoing revolution that may yet transform our hemisphere This perceptive and richly eventful study by one of Mexico's most distinguished political scientists tells the story behind the failed movements of the past thirty years while suggesting that the left has a continuing relevance in a continent that suffers from destitution and social inequality Combining insider's accounts of intrigue and armed struggle with a clear sighted analysis of the mechanisms of day to day power Utopia Unarmed is an indispensable work of scholarship reportage and political prognosis

movement to be dynamic and highly diverse this book reveals that ecclesial and political conflicts especially over Peronism and celibacy were at the heart of the construction of a liberationist Christian identity which simultaneously internalised deep tensions over its relationship to the Catholic Church It first situates the rise of a revolutionary Christian impulse in Argentina within changes in society in Catholicism and Protestantism and in Marxism in the 1930s before analysing how the phenomenon coalesced in the late sixties into a coherent social movement Finally the book examines the responses of liberationist Christians to the intense period of repression under the presidency of Isabel Per n and the rule of the military junta between 1974 and 1983 **Marxist Historiographies** Q. Edward Wang, Georg G. Iggers, 2015-07-16 Marxist

Historiographies is the first book to examine the ebb and flow of Marxist historiography from a global and cross cultural perspective Since the eighteenth century few schools of historical thought have exerted a more lasting impact than Marxism and this impact extends far beyond the Western world within which it is most commonly analysed Edited by two highly respected authors in the field this book deals with the effect of Marxism on historical writings not only in parts of Europe where it originated but also in countries and regions in Africa Asia North and South America and the Middle East Rather than presenting the chapters geographically it is structured with respect to how Marxist influence was shown in the works of historians in a particular area This title takes a dual approach to the subject some chapters are national in scope addressing the Marxist impact on historical practices within a country whereas others deal with the varied expressions of Marxist historiography throughout a wider region Taking a truly global perspective on this topic Marxist Historiographies demonstrates clearly the breadth and depth of Marxism s influence in historical writing throughout the world and is essential reading for all students of historiography *Christianity and democratisation* John Anderson, 2013-07-19 This book examines

the contribution of different Christian traditions to the waves of democratisation that have swept various parts of the world in recent decades It offers a historical overview of Christianity s engagement with the development of democracy before focusing in detail on the period since the 1970s Successive chapters deal with the Roman Catholic conversion to democracy and the contribution of that church to democratisation the Eastern Orthodox hesitation about democracy the alleged threat

to American democracy posed by the politicisation of conservative Protestantism and the likely impact on democratic development of the global expansion of Pentecostalism The author draws out several common themes from the analysis of these case studies the most important of which is the liberal democracy paradox This ensures that there will always be tensions between faiths that proclaim some notion of absolute truth and political orders that are rooted in the idea of compromise negotiation and bargaining Written in an accessible style this book will appeal to students of politics sociology and religion and prove useful on a range of advanced undergraduate and postgraduate courses Political Order and the Plural Structure of Society James W. Skillen, Rockne M. McCarthy, 1991 This excellent volume explores three forms of pluralist theory those based on historical doctrines of custom and tradition Catholic doctrines of natural law and subsidiarity and Calvinist doctrines of sphere sovereignty and creation and compares and evaluates each of these forms of pluralism within the context of American thought **Local Church, Global Church** Stephen J.C.
