and prosperity at peril If we want to bring manufacturing jobs back here to the U S corporate managers must seek productivity and innovation improvements in U S operations Jack Buffington knows all too well how quickly things can go downhill for U S businesses Turned into a relentless cost cutter by the forces of globalization and Wall Street s expectations for short term gains he like thousands of other U S executives has watched some of the companies he s worked for disappear for want of real value Whereas America once prized managers who displayed skill in optimizing the interplay of capital labor and technology to grow a company today s professional manager is rewarded more often for being a cost cutter than an innovator Fortunately this book not only outlines the problem it outlines the solution as well by establishing a 21st century definition of management that will succeed in today s global economy Rather than angling to produce a penny more of earnings per share to please the financiers corporate managers will see once again how to use their ingenuity to produce products services and business processes that not only provide generous profits but sustain a business and its jobs for years to come By heeding Buffington s call the U S can rekindle its zeal for innovation leading to an era in which consumers workers investors and managers all prosper
