Illuminating Metalwork Joseph Salvatore Ackley, Shannon L. Wearing, 2021-12-20 The presence of gold, silver and other metals is a hallmark of decorated manuscripts the very characteristic that makes them illuminated. Medieval artists often used metal pigment and leaf to depict metal objects both real and imagined such as chalices, crosses, tableware and even idols. The luminosity of these representations contrasted pointedly with the surrounding paints enriching the page and dazzling the viewer. To elucidate this key artistic tradition this volume represents the first in depth scholarly assessment of the depiction of precious metal objects in manuscripts and the media used to conjure them. From Paris to the Abbasid caliphate and from Ethiopia to Bruges the case studies gathered here forge novel approaches to the materiality and pictoriality of illumination. In exploring the semiotic, material, iconographic and technical dimensions of these manuscripts the authors reveal the canny ways in which painters generated metallic presence on the page. *Illuminating Metalwork* is a landmark contribution to the study of the medieval book and its visual and embodied reception and is poised to be a staple of research in art history and manuscript studies accessible to undergraduates and specialists alike.
