The Rangelands of Libya Gustave Gintzburger, Slim Saïdi, 2025-02-07. Libya remains a land of mysteries with a harsh arid climate, a land rich in millenaries of troubled history, a land where the Sahara meets the Mediterranean Sea, a land where the West and the East Mediterranean merge. Libya is also a land where the desert and the sown intermingle in the steppe country where the rainfall is unpredictable, the soils are poor, rocky, saline, rendering rainfed cultivation hazardous, where grazing and rainfed cropping remained for long the only viable agricultural options. Over the past 60 years, oil resources allowed gigantic agricultural development projects, urbanization, road network expansion and well drilling. This changed the ways of life of rural populations, impacting and undoubtedly altering rangelands conditions and systems, as well as native vegetation cover, wildlife and land use. This book is offered in hopes of a better future for the Libyan people and the whole Mediterranean arid regions from Morocco to Pakistan.
