Fields G. Goffey, J.G. Gluyas, 2020-12-03 Geological Society Memoir 52 records the extraordinary 50 year journey that has led to the development of some 458 oil and gas fields on the UKCS. It contains papers on almost 150 onshore and offshore fields in all of the UK's main petroliferous basins. These papers range from look backs on some of the first developed gas fields in the Southern North Sea to papers on fields that have only just been brought into production or may still remain undeveloped and includes two candidate CO₂ sequestration projects. These papers are intended to provide a consistent summary of the exploration appraisal development and production history of each field leading to the current subsurface understanding which is described in greater detail. As such the Memoir will be an enduring reference source for those exploring for developing producing hydrocarbons and sequestering CO₂ on the UKCS in the coming decades. It encapsulates the petroleum industry's deep subsurface knowledge accrued over more than 50 years of exploration and production. Historical Dictionary of the Petroleum Industry Marius S. Vassiliou, 2018-06-20 The petroleum industry is unique it is an industry without which modern civilization would collapse. Despite the advances in alternative energy petroleum's role is still central. Petroleum still drives economics geopolitics and sometimes war. The history of petroleum is to some measure the history of the modern world. This book represents a concise but complete one volume reference on the history of the petroleum industry from pre modern times to the present day covering all aspects of business technology and geopolitics. The book also presents an analysis of the future of petroleum and a highly useful set of statistical graphs. Anyone interested in the history status and outlook for petroleum will find this book a uniquely valuable first place to look. This new second edition incorporates all the revolutionary changes in the petroleum landscape since the first edition was published including the boom in extraction of oil and gas from shale formations using techniques such as fracking and horizontal drilling. This second edition of Historical Dictionary of the Petroleum Industry contains a chronology an introduction appendixes and an extensive bibliography. The dictionary section has over 500 cross referenced entries on companies people events technologies countries provinces cities and regions related to the history of the world's petroleum industry. This book is an excellent resource for students researchers and anyone wanting to know more about the petroleum industry. **World's Giant Oil and Gas Fields, Geologic Factors Affecting Their Formation, and Basin Classification** Michel T. Halbouty, Arthur Augustus Meyerhoff, Robert E. King, Robert H. Dott, H. Douglas Klemme, Theodore Shabad, 1970* **World Atlas of Oil and Gas Basins** Guoyu Li, 2011-01-04 Professor Li's World Atlas of Oil and Gas Basins is a fresh and comprehensive treatise of the distribution of the world's hydrocarbon reserves. The Atlas highlights the geographical sedimentary and geological features of the basins using a combination of maps and stratigraphic diagrams to depict the history prospectivity and commercial production capacity of the reserves on a continental and country by country basis. The Atlas is an essential reference source for petroleum geologists and reservoir engineers working in hydrocarbon exploration and production. It is also a valuable and original teaching aid for university graduate and postgraduate courses. The Atlas provides a welcome addition to the global

database of the world's energy resources and is therefore an indispensable source of information for the formulation of future strategies to exploit oil and gas reserves. Written by one of China's foremost petroleum geologists, the Atlas provides a rare analysis of the industry from the perspective of the country whose demand for oil and gas is set to become the largest in the next few decades. It is an important and vital scholarly work.

Giant Oil and Gas Fields of the Decade 1990-1999, *Global Oil and Gas Resources: Potential and Distribution*
Lirong Dou, Zhixin Wen, Zhaoming Wang, 2024-10-24

This open access book presents the evaluation of undiscovered oil and gas resources and reserves growth in 468 basins around the world as well as the potential of unconventional recoverable resources of seven types including shale oil, heavy oil, oil sands, oil shale, shale gas, coalbed methane, and tight gas. The evaluation methods used are innovative, incorporating both conventional and unconventional oil and gas resources evaluation methods that utilize plays as the fundamental evaluation unit based on various exploration maturity levels. The evaluation results obtained independent intellectual property rights and provide an overview of the future exploration potential and prospects of different regions. It is a valuable reference for researchers, practitioners, and students involved in petroleum exploration.
