Calibrating the Cosmos Frank Levin, 2007-04-05

Calibrating the Cosmos describes hard science but is gently written It explains in clear non mathematical language the measurements and the interpretation of the resulting data that have led to the current understanding of the origin evolution and properties of our expanding Big Bang universe Many people have a sketchy idea of the work of cosmologists but Professor Levin's experience in teaching both scientific and liberal arts students has enabled him to impart much of our current thinking without resorting to difficult mathematics Theoretical concepts are emphasized in particular the symmetries of homogeneity and isotropy enjoyed by our universe on the largest scales how these symmetries lead to only one quantity being needed to describe the growth of the universe from its infancy to the present time and how the so called parameters of the universe are the ingredients used to construct the model universes to which ours the real thing is compared Levin includes the 2003 results from the Wilkinson Microwave Anisotropy Probe WMAP and the 2003 and 2004 results of the Sloan Digital Sky Survey to ensure that the book is up to date He explains the relevance of the discoveries done by the new physics Nobel laureates Smoot and Mather Background material is provided in the first four chapters the current picture and how it was attained are discussed in the next four chapters and some unsolved problems and conjectured solutions are explored in the final chapter

Phenomenology and the Human Positioning in the Cosmos Anna-Teresa Tymieniecka, 2012-10-11 The classic conception of human transcendental consciousness assumes its self supporting existential status within the horizon of life world nature and earth Yet this assumed absoluteness does not entail the nature of its powers neither their constitutive force This latter call for an existential source reaching beyond the generative life world network Transcendental consciousness having lost its absolute status its point of reference it is the role of the logos to lay down the harmonious positioning in the cosmic sphere of the all establishing an original foundation of phenomenology in the primogenital onto-poiesis of life

The Cosmic Republic A. Capizzi, 2022-04-19 According to Aristotle philosophy had come into being in the VIth century with Thales just as a mere disinterested pursuit of truth a curiosity for great problems those even tually called metaphysical ones which were substantially identical with those which Aristotle himself and his school were now raising This abstract reading is very similar

to that which views Greek poets as inspired by eternal beauty or by art s for art sake and which is nowadays completely discredited and given up by scholars of the history of literature Against this view the present text pro poses a new reading of the archaic presocratic scientists in fact it is about those sages who lived on the bound aries of the Greek speaking world before the concentration of such people in Periclean Athens They were closely linked to their native towns Miletus Ephesus Croto Vele Acragas where they held high office here there oral teaching and the public reading of their texts were followed closely by their fellow citizens Thus the picture of the cosmic republic arises to the cosmic monarchy of Homer and Hesiod the mythical world with Zeus as the king gods as the ministers and nature as the subject a different mythical world succeeds Here the earth the sea the sky the human body and generally the existing thing all behave like isonomic republican towns or like the governing body of these towns Philosophy will arise later in Athens of the Vth century
