Exemplars, Imitation, and Character Formation Eric Yang, 2024-08-22 This volume examines the role and relevance of exemplars and the practice of imitation in character development and formation While the role of exemplars and imitation in spiritual and moral formation has been an integral part of many religious and wisdom traditions in recent times there has been limited theological and philosophical investigation into it and a dearth of interdisciplinary discussion The book brings together relevant research and insights from leading experts within philosophy psychology and theology with a slight emphasis on Christian approaches to exemplars and imitation especially given the reflection on these themes throughout the history of the Christian intellectual and mystical tradition Many of the contributions display an interdisciplinary approach into these issues hence this volume will be of interest to philosophers psychologists theologians and others who work in moral psychology and character formation

Neurobiology and the Development of Human Morality: Evolution, Culture, and Wisdom (Norton Series on Interpersonal Neurobiology) Darcia Narvaez, 2014-10-20 Winner of the William James Book Award Winner of the inaugural Expanded Reason Award A wide ranging exploration of the role of childhood experiences in adult morality Moral development has traditionally been considered a matter of reasoning of learning and acting in accordance with abstract rules On this model largely taken for granted in modern societies acts of selfishness aggression and ecological mindlessness are failures of will moral problems that can be solved by acting in accordance with a higher rationality But both ancient philosophy and recent scientific scholarship emphasize implicit systems such as action schemas and perceptual filters that guide behavior and shape human development In this integrative book Darcia Narvaez argues that morality goes all the way down into our neurobiological and emotional development and that a person's moral architecture is largely established early on in life Moral rationality and virtue emerge bottom up from lived experience so it matters what that experience is Bringing together deep anthropological history ethical philosophy and contemporary neurobiological science she demonstrates where modern industrialized societies have fallen away from the cultural practices that made us human in the first place

Neurobiology and the Development of Human Morality advances the field of developmental moral psychology in three key ways First it provides an evolutionary framework for early childhood experience grounded in developmental systems theory encompassing not only genes but a wide array of environmental and epigenetic factors Second it proposes a neurobiological basis for the development of moral sensibilities and cognition describing ethical functioning at multiple levels of complexity and context before turning to a theory of the emergence of wisdom Finally it embraces the sociocultural orientations of our ancestors and cousins in small band hunter gatherer societies the norm for 99% of human history for a re envisioning of moral life from the way we value and organize child raising to how we might frame a response to human made global ecological collapse Integrating the latest scholarship in clinical sciences and positive psychology Narvaez proposes a developmentally informed ecological and ethical sensibility as a way to self author and revise the ways we think about parenting and sociality The techniques she describes point towards an alternative vision of moral development and flourishing one that synthesizes traditional models of executive top down wisdom with primal wisdom built by multiple systems of biological and cultural influence from the ground up

The Unspoken Morality of Childhood Kristen Renwick Monroe, 2022-05-10 The Unspoken Morality of Childhood reflects the thoughts of a senior ethicist as she ponders the moral questions we all encounter in everyday life Each essay describes a commonplace event a child learning to read or asking to be quizzed on spelling first graders bonding on playground swings brothers talking on the way home from school a young girl leaving for college Monroe sensitively infuses these moments with a thoughtful tenderness that reveals the beauty in our daily routine and the wisdom all parents crave Her reflections on the ethical issues raised as part of our daily lives lend valuable insight into critical moral topics how nostalgia and love of home can be exploited by unscrupulous politicians who turn fear into political weapons that divide us but elect them How forgiveness may not always be the best way to move on after a hurt Moral imagination's unique ability to help us conceptualize our way out of seemingly intransigent problems Agency passion unconditional love and the painful growth that can accompany loss Above all Monroe highlights the tremendous power of identity and self esteem and the recognition that we must honor the humanity in others in order to fully claim it in ourselves
