Obama It shows how their framings of identity i.e. of the American self and the enemy other facilitated a certain construction of threat that shaped the presidents detention and interrogation policies By defining what was necessary in the name of national security Bush's narrative justified the operation of the detention center at Guantanamo Bay and rendered the mistreatment of detainees possible a situation that would have otherwise been illegal Bush's framings therefore enabled legal limits to be pushed and made the violation of rules appear legitimate Obama in contrast constructed a threat scenario that required an end to rule violations and the closure of Guantanamo for security reasons According to this narrative a return to the rule of law was imperative if the American people were to be kept safe However Obama's framing was continually challenged and it was never able to dominate public discourse Consequently Framing the Threat argues Obama was unable to implement the policy changes he had announced

Discourse and Power Teun A van Dijk, 2017-09-16 Teun van Dijk is one of the founders of Critical Discourse Studies and this collection brings together some of his most important writing framed by new introductory material He examines the role of discourse in the reproduction of power and domination in society and the ways in which media and political elites control access to public discourse

Dedaić, 2015-10-15 The discourses of the post apartheid South Africa embody symbols of change and promises of new lessons in history This is the first volume that brings together analyses of a variety of discourses produced in South Africa through which we follow the evolution of transitional processes in the country s political institutions and in the opinions of its populace The book offers to the reader a visit to the Parliament a peek into the internet forums analyses of the country s official papers and speeches and the media accounts Through all these discourses we see the burning questions Who Are We Now and Who Do We Want To Be being repetitively examined and identities cross formed while the country deals with new post apartheid challenges as well as successes

Formal Aspects of Context Pierre Bonzon, Marcos Cavalcanti, Rolf Nossun, 2013-04-17 We welcome Volume 20 Formal Aspects of Context Context has always been recognised as strongly relevant to models in language philosophy logic and artificial intelligence In recent years theoretical advances in these areas and especially in logic have accelerated the study of context in the international community An annual conference is held and many researchers have come to realise that many of the old puzzles should be reconsidered with proper attention to context The volume editors and contributors are from among the most active front line researchers in the area and the contents shows how wide and vigorous this area is There are strong scientific connections with earlier volumes in the series I am

confident that the appearance of this book in our series will help secure the study of context as an important area of applied logic D M Gabbay INTRODUCTION This book is a result of the First International and Interdisciplinary Conference on Modelling and Using Context which was organised in Rio de Janeiro in January 1997 and contains a selection of the papers presented there refereed and revised through a process of anonymous peer review The treatment of contexts as bona fide objects of logical formalisation has gained wide acceptance in recent years following the seminal impetus by McCarthy in his Turing award address *The Handbook of Conflict Resolution* Peter T. Coleman, Morton Deutsch, Eric C. Marcus, 2014-02-28 Praise for The Handbook of Conflict Resolution This handbook is a classic It helps connect the research of academia to the practical realities of peacemaking and peacebuilding like no other It is both comprehensive and deeply informed on topics vital to the field like power gender cooperation emotion and trust It now sits prominently on my bookshelf Leymah Gbowee Nobel Peace Prize Laureate The Handbook of Conflict Resolution offers an astonishing array of insightful articles on theory and practice by leading scholars and practitioners Students professors and professionals alike can learn a great deal from studying this Handbook William Ury Director Global Negotiation Project Harvard University coauthor Getting to Yes and author The Third Side Morton Deutsch Peter Coleman and Eric Marcus put together a handbook that will be helpful to many I hope the book will reach well beyond North America to contribute to the growing worldwide interest in the constructive resolution of conflict This book offers instructive ways to make this commitment a reality George J Mitchell Former majority leader of the United States Senate former chairman of the Peace Negotiations in Northern Ireland and the International Fact Finding Committee on Violence in the Middle East chairman of the board Walt Disney Company senior fellow at the School of International and Public Affairs Columbia University Let's be honest This book is just too big to carry around in your hand But that's because it is loaded with the most critical essays linking the theory and practice of conflict resolution The Handbook of Conflict Resolution is heavy on content and should be a well referenced resource on the desk of every mediator as it is on mine Johnston Barkat Assistant Secretary General Ombudsman and Mediation Services United Nations

Language Planning in Primary Schools in Asia Richard Baldauf, Robert Kaplan, Knonko Kamwangamalu, Pauline Bryant, 2013-09-13 In foreign language education decisions must be taken on what languages to teach who will teach them in which schools i.e. all only urban only rural in which grades the number of hours a week and the cost involved This book explores the answers to these questions across a number of Asian polities It illustrates why some of the efforts undertaken are successful and why some are not why despite significant investments of time and resources some students do not seem to acquire the languages being taught and why some teachers responsible for instruction in the designated foreign languages have problems achieving fluency in the designated language or have other language teaching difficulties It suggests some strategies various polities might attempt to achieve their stated language learning objectives This book was originally published as a special issue of Current Issues in Language Planning **Giving Meanings to the World** Giovanna

Dell'Orto,2002-06-30 How did the first United States foreign correspondents help shape an American common sense about the rest of the world This new study is the first to address this key question examining the images of foreign countries that emerge from the first formally organized American foreign correspondence Its focus is on the discourses of the world constructed in mid 19th century correspondence which provided American newspaper readers with their first cohesive view of the world outside its borders By emphasizing the emergence of foreign correspondence across its first two decades 1838 1859 and by comparing it to images in editorial and congressional debates of the time Giovanna Dell Orto s analysis addresses the pivotal question of what meanings were ascribed to foreign cultures during this key time Giving Meanings to the World also establishes for the first time in scholarly literature the early history of the content of foreign news and editorials in American newspapers while also exploring alternative constructions of foreign cultures in the correspondence for an African American newspaper and by women writers Unique in both subject matter and approach this work gathers together and puts into perspective an array of information and discussion about how America viewed other nations in the early days of foreign correspondence **Law in Action** Max Travers,John F. Manzo,2016-12-05 Ethnomethodologists and Conversation Analysts have always been interested in the study of law and legal institutions and there is now a large body of empirical studies representing a range of analytic traditions in each field This collection introduces this literature and the research questions pursued by ethnomethodologists and conversation analysts in an accessible form to a general audience in the inter disciplinary field of law and society studies Handbook of Social Psychology John DeLamater,Amanda Ward,2013-08-13 This handbook provides a broad overview of the field of social psychology and up to date coverage of current social psychological topics It reflects the recent and substantial development of the field both with regard to theory and empirical research It starts out by covering major theoretical perspectives including the inter actionist identity social exchange social structure and the person perspectives Next it discusses development and socialization in childhood adolescence and adulthood In addition to updated discussions of topics that were included in the first edition the part examining personal processes includes entirely new topics such as social psychology and the body and individual agency and social motivation Interpersonal processes are discussed from a contemporary perspective with a focus on stress and health The final section examines the person in sociocultural context and includes another topic new to the second edition the social psychology of race and gender and intersectionality
