

Figure 3 *Colpodes habilis* Sloane (Carabidae: Agonini).

The tribe Lebiini includes a large number of species which have a generally rectangular outline and are somewhat flattened. The elytra of many are obliquely truncated. Many are arboreal, living on the foliage or on the bark of trees. The genus *Catascopus* includes a number of species which live on and under the bark of dead trees. Most of them are handsome, shining, blue-green or purple in color and quite large in size, ranging from 10 to 20 mm. They have prominent eyes and long legs and are very active insects, quickly running for cover when a piece of bark is pulled from a log, and flying readily if cornered. *C. elegans* Weber is 10 mm long and is a metallic green color. It is very common in lowland rain forest, whilst *C. wallacei* Saunders has rather purplish colored elytra with a bright coppery red prothorax. It is 18 mm long and seems to be quite common in the highlands. Another important genus is *Demetrida* which contains some 160 or so species. These are frequently encountered on the foliage of rain forest trees. Their colors vary from a green, with various shining reflections, to brown and black. They are not particularly large insects, being some 5–8 mm in length.

Wampar-English Dictionary Hans Fischer, Bettina Beer, 2021-12-09 This ethnographic dictionary is the result of Hans Fischer's long term fieldwork among the Wampar who occupy the middle Markham Valley in Morobe Province Papua New Guinea PNG. Their language Dzob Wampar belongs to the Markham family of the Austronesian languages. Today most Wampar speak not only Wampar but also PNG's lingua franca Tok Pisin. Six decades of Wampar research has documented the extent and speed of change in the region. Today mining migration and the commodification of land are accelerating the pace of change in Wampar communities resulting in great individual differences in knowledge of the vernacular. This dictionary covers largely forgotten Wampar expressions as well as loanwords from German and Jab m that have become part of everyday language. Most entries contain example sentences from original Wampar texts. The dictionary is complemented by an overview of ethnographic research among Wampar, a sketch of Wampar grammar, a bibliography and an English to Wampar finder list. *Biodiversity, Biogeography and Nature Conservation in Wallacea and New Guinea* Dmitry Tel'nov, 2011-08-01 **Biogeography and Ecology of New Guinea** J. Individual chapters cover the island's history of exploration, geology, climate and weather, biogeography, plantlife, insects, spiders, and other invertebrates, freshwater fishes, snakes, lizards, and frogs, birdlife, mammals, paleontology, paleoanthropology, cultural and linguistic diversity, surrounding islands and reefs, the pristine forest of the Foja Mountains, village life, and future sustainability.
