continues today an unwanted pregnancy can be seen in many different lights an inconvenience a crisis or a turning point From June 1973 up until June of 2022 people in the United States capable of becoming pregnant could to varying degrees access healthcare that would end an unwelcome pregnancy Now that this right has been gutted the consequences are far reaching and ever unfolding In clinician offices the issue of abortion might seem remote based upon the population being seen However this issue impacts those long past reproductive age and is an important event that most therapists are woefully unprepared to deal with should it come up With abortion in the news previous experiences of abortion can come up as memories for clients past their reproductive years or with younger clients an inability and fear to stop an unwanted pregnancy As clinicians are human we come to this issue with our own moral religious and experiential baggage that might blind us as how to best support our clients This book is an important addition to the scant amount of literature available for clinicians that might unexpectedly be faced with a client that is struggling with an abortion decision or access The most recent book was published over five years ago under a completely different legislative landscape In addition to assisting clinicians in client care this book will also speak to potential legal risks to clinicians about abortion help *A Clinical Guide for Contraception* Leon Speroff, Philip D. population Asia is the largest and by far the most populous continent. It is also extremely diverse physically and culturally. Asian countries and regions have their own distinctive histories, cultural traditions, religious beliefs, and political systems, and they have often pursued different routes to development. Asian populations also present a striking array of demographic characteristics and stages of demographic transition. This handbook is the first to provide a comprehensive study of population change across the whole of Asia. Comprising 28 chapters by more than 40 international experts, this handbook examines demographic transitions on the continent, their considerable variations, their causes and consequences, and their relationships with a wide range of social, economic, political, and cultural processes. Major topics covered include population studies and sources of demographic data, historical demography, family planning and fertility decline, sex preferences, mortality changes, causes of death, HIV/AIDS, population distribution and migration, urbanization, marriage and family, human capital and labour force, population ageing, demographic dividends, political demography, population and environment, and Asia's demographic future. This handbook provides an authoritative and comprehensive reference for researchers, policymakers, academics, students, and anyone who is interested in population change in Asia and the world. *International Handbook on Abortion* Paul Sachdev, 1988-06-28.
