## **Liberating Creation Foundations Of Religious Social Ethics:**

*Liberating Creation* Gibson Winter,1981      **Social Ethics in the Making** Gary Dorrien,2011-04-06 In the early 1880s proponents of what came to be called the social gospel founded what is now known as social ethics This ambitious and magisterial book describes the tradition of social ethics one that began with the distinctly modern idea that Christianity has a social ethical mission to transform the structures of society in the direction of social justice Charts the story of social ethics the idea that Christianity has a social ethical mission to transform society from its roots in the nineteenth century through to the present day Discusses and analyzes how different traditions of social ethics evolved in the realms of the academy church and general public Looks at the wide variety of individuals who have been prominent exponents of social ethics from academics and self styled public intellectuals through to pastors and activists Set to become the definitive reference guide to the history and development of social ethics Recipient of a CHOICE Outstanding Academic Title for 2009 award      **The Church's Public Role** Dieter T. Hessel,2002-01-24      From Creation to New Creation Bernhard W. Anderson,2005-01-26 Princeton theologian Bernhard Anderson explores the historical mythopoeic and theological dimensions of classic Old Testament reflections on the motif of creation The result is an abundance of fresh insight and compelling exegesis that have implications for human life and thought today      **The World Calling** Thomas W. Ogletree,2004-01-01 Thomas Ogletree has devoted much of his career to exploring the significance of Ernst Troeltsch's seminal work *The Social Teaching of the Christian Churches* The articles in *The World Calling* use a Troeltschian lens to explore fundamental issues underlying any Christian social witness in the context of American democratic institutions      *Metaphor and Its Moorings* M. Elaine Botha,2007 Human knowledge and language reflect the metaphorical nature of the human experiential and conceptual system The author shows that metaphor and its underlying analogical structure are significant keys to the understanding of the metaphorical nature of reality and cognition and provide a better understanding of the relationship between science and religion This study builds critically on the insights of Lakoff and Johnson by introducing a new angle to the discussions concerning conceptual metaphor and its basis in human embodiment In her proposed alternative to the traditional view of knowledge the author argues that the distinction between literal and metaphorical language ought to be revisited and replaced with a view in which the idea of proper analogy and necessary metaphors are acknowledged The insights gained in this respect are also applied to the changing views concerning theory and observation in scientific theorizing A case study on the relationship between religion and science in the work of Michael Faraday illustrates that scientific observation is impregnated with theoretical convictions and that metaphors play a decisive role in the models developed to understand reality      *Zion, the City of the Great King* Ben C. Ollenburger,1987-01-01      Modern Catholic Social Teaching Joe Holland,2003 The impact of the industrial revolution on the social structures of industrialized nations posed a difficult challenge to the Catholic Church and its Popes In the struggle for human and economic status should the Church side with

the new working class or with capitalist barons who along with the old aristocracy identified themselves as upholders of Christian civilization In this history of papal social teaching Joe Holland tells how the popes at first backed the status quo Then with the accession of Pope Leo XIII in 1878 a seismic shift took place Leo s encyclical *Rerum novarum* was the first authoritative Church voice to declare that laboring people have rights the right to fair wages to decent living conditions the right to organize labor unions and even to strike Henceforth the notion of civilization at least for the Church would be grounded in the lives and aspirations of working people Modern Catholic Social Teaching traces this historic shift as it played out in the writings of Leo and the popes who followed him Pius X Benedict XV Pius XI and Pius XII These popes supported Leo s encyclical and even elaborated it as European history experienced the emergen      *Becoming Children of God* Wes Howard-Brook,2003-10-21 *Becoming Children of God* offers a fresh and original commentary on the Gospel of John as a narrative inviting readers both in the evangelist s time and our own to a radical commitment to follow Jesus from within a spirit filled community This reading is grounded in a poetics of biblical narrative that balances attention to historical ideological and aesthetic aspects of John s Gospel while highlighting its relevance for today By committing himself to a close analysis of the text as symbolic action Howard Brook makes it clear how John s Gospel fairly bristles with references to societal conditions that demand a direct response Throughout the commentary his close attention to literary structure as well as social background yields new insights into the often obscure message of the Fourth Gospel      **Gratitude for the Wild** Nathaniel Van Yperen,2019-06-17 Since the passage of the Wilderness Act of 1964 a hotly contested debate over the value of wilderness reveals cultural anxieties about an American society that has spurned limits *Gratitude for the Wild* explores how the wild known in wilderness raises our tolerance for mystery in the recognition of our limits and in the celebration of a God loved world that exceeds our grasping The idea of wilderness introduces questions about the balance between utility and appreciation and between enjoyment and restraint Wilderness is a nexus of competing and contested accounts of responsibility In conversation with the work of Doug Peacock Terry Tempest Williams James Gustafson and Martin Luther King Jr Nathaniel Van Yperen offers an original argument for how wilderness can evoke a vision of a good life in which creaturely limits are accepted in gratitude even in the face of ambiguity and mystery Through the theme of gratitude the book refocuses attention on the role of affection and testimony in ecological ethics and Christian ethics      **Pragmatic Theology** Victor Anderson,1998-01-29 Argues that while contemporary American philosophies and philosophers of religion are proclaiming the end of theology a neopragmatism has arrived to fill the void in meaning and moral fulfillment to which theology once supplied answers      *Bread in a Starving Africa* Murv L. Kandakai Gardiner PhD,2023-02-16 *Bread in a Starving Africa* is about the historiae of Liberia The Episcopal Church of Liberia The Gardiner Family and the Civilizational Excellency of Ethiopia The Author Murv L Kandakai Grdiner PhD is currently a preceptor within the Educational Ministry at St Edward s Episcopal Church in Lawrenceville Georgia He formerly taught Power and Politics in Modern Africa Black

Identity Religion and Politics at Rutgers University in New Brunswick NJ Introduction to Psychology and African American Studies at The College of New Jersey TCNJ Religion and Philosophy at Sacred Heart University at Fairfield CT Psychology and History at William V S Tubman University in Harper Maryland Liberia and Political Science and Africana Seminars within the Department of African and Asian Studies at Addis Ababa University Addis Ababa Ethiopia      **Saved from Silence** Mary Donovan Turner, Mary Lin Hudson, 2014-04-30 In this postmodern age women preachers are finding their voice a distinctive way of proclamation This book looks at the metaphor of voice how women are moving to voice from silence and how individuals can make themselves heard by those who don't want to hear      *The New Universalism* David J. Krieger, 2006-05-03 By making claims for its universalism a religious community establishes its collective identity orients itself in the world and articulates its basic common convictions about what is real meaningful valuable For those engaged in the search for a theology of religions in today's context of appreciation for radical plurality the question is this Can there be a single unified theology that expresses adequately the apparently very different truths of humanity's religions The New Universalism argues that theology can no longer content itself with correlating the question which the world poses with the answer given in revelation Within today's global horizon every religion and worldview has as much right to answer the basic questions of human existence as any other The task confronting theology therefore lies in the integration and mutual appropriation of many seemingly conflicting revelations Drawing upon the work of Panikkar and Wittgenstein Krieger constructs a method and a philosophical foundation for resolving ideological conflicts and carrying out a theological appropriation of non-Christian religions      **Reconstructing Old Testament Theology** Leo G. Perdue, In this informative and keen look at contemporary trends in Old Testament theology Perdue builds on his earlier volume *The Collapse of History* 1994 He investigates how a variety of perspectives and methodologies have impacted how the Old Testament is read in the twenty-first century including literary criticism rhetorical criticism feminist womanist and mujerista theologies liberation theology Jewish theology postmodernism and postcolonialism Perdue provides a sensitive reading of the aims of these approaches as well as providing critique and setting them in their various cultural contexts In his conclusion the author provides a look at the future and how these various voices and approaches will continue to impact how we carry out Old Testament theology      *Critical Theory: Rituals, Pedagogies and Resistance* Peter McLaren, 2022-03-28 This collection of essays incorporates some of the most important and longstanding foundational texts in education developed by the leading educational neo-Gramscian social theorist Peter McLaren The volume provides a much necessary framework for understanding more precisely not only the historical and philosophical foundations for McLaren's ideas but even more importantly it unpacks a clear understanding of the dynamics of ideological production framing the epistemicidal nature of capitalist schools The chapters provide state-of-the-art approaches grounded in both Marxist social theory and post-critical sensibilities They show the unique opportunities provided by critical theoretical approaches towards revolutionary

pedagogies which are crucial to address the current challenges one is facing locally nationally and internationally Critical Theory Rituals Pedagogies and Resistance speaks to the current challenges we face as humanity not only situating them historically but also securitizing the role that our educational institutions curriculum matrixes and teacher education programs have played in such social havoc It provides crucial insights not only to help a better understanding of the accomplishments produced by the critical educational and curriculum river in the struggle against the educational and curriculum epistemicide but also to help explore alternative ways responsive to the world s endless epistemological difference and diversity While the future of our field needs to go beyond Peter McLaren s intellectual thesaurus it cannot certainly avoid going through him The itinerant curriculum theory and the ICTheorists are conscious about that Jo o M Paraskeva Professor of Educational Leadership and Policy Studies University of Strathclyde

**Greece in the Balkans** Othon Anastasakis,Dimitar Bechev,Nicholas Vrousalis,2020-07-13 This volume brings together young researchers in an interdisciplinary study of Greek interaction with other Balkan states over the past two hundred years The thirteen chapters of the volume reflect the diversity of a long and complex relationship between Greece and its Balkan neighbours They thus shed refreshing light on its persistent attributes of opportunity and risk attraction and enmity exchange and exclusion through exploration of historical anthropological literary political and economic perspectives

*Toward a Theology of Struggle* Eleazar S. Fernandez,2009-02-01 The Theology of Struggle is a genuinely popular Filipino theology rooted in the history and culture of a people who have endured colonial oppression at the hands of Spain North America and Japan as well as neo colonialism and home grown dictatorship Because Christianity has played a role in assisting the history of oppression in the Phillippines a theology of struggle must include a struggle in theology to wrest Christian symbols from the hands of the oppressors and return them to the poor This theology which is otherwise expressed in articles poems art and action receives its first systematic treatment in *Toward a Theology of Struggle* In Part One Fernandez establishes the historical and cultural context out of which the Theology of Struggle has emerged Part Two represents Fernandez s own constructive work in which he shows how a theology of struggle must address the quest for identity and peoplehood In Part Three Fernandez explores the question of theological method outlining the areas of convergence and distinction between the Theology of struggle and other Third World theologies as well as setting forth the distinctive challenge that this theology of the Philippines poses to the authority and dominance of Western theology as a whole

**Re-visioning the Church** Neil Ormerod,2014 According to longstanding tradition theology can be thought of as faith seeking understanding Ecclesiology then seeks to understand the theological reality we call church *Re Visioning the Church* the outcome of nearly two decades of research and writing towards constructing a systematic historical ecclesiology applies a social scientific and historical outlook to the story of the emergence development and ongoing mission and ministry of the church Establishing a critical framework for understanding the structures of the church the work is a wide scale exploration of the religious cultural and social dimensions of what it

means to be the church and what structures and ministries form the fundamental parts of ecclesial life in its relationship to the kingdom The heart of the project is a detailed account of the history development and change across the centuries of the church that takes the story from the apostolic band of witnesses to the dramatic global event of the Second Vatican Council

**Spirituality and Society** David Ray Griffin, 1988-01-01 This book takes a genuinely new spiritual stance reflecting the emergence of a post modern science and differing from the relativistic nihilism that calls itself postmodern but is really modernism extended to its limit Based on a direct experience of reality as divine this postmodern spirituality transcends modernity s individualism and patriarchy its forced choices between dualism and materialism anthropocentrism and relativism supernaturalism and atheism intolerance and nihilism Bringing moral and ethical values back into rational discourse this book provides a critique of various aspects of modern society political economic social agricultural and technological aspects This criticism informed by the postmodern worldview points toward a more satisfying form of personal existence and a sustainable form of global order
