Liberations New Essays On The Humanities In Revolution:

Liberations ,1972 **Liberations** Ihab Habib Hassan,John Cage,1972 *Modernism - Dada - Postmodernism* Richard Sheppard,2000 Modernism Dada Postmodernism collects updates integrates and contextualizes the critic Richard Sheppard s essays on the historical avant garde Sheppard s topic in all of these essays is the modernist writers artists and philosophers linguistic and visual responses to a changed sense of reality and human nature Beginning with an overview of the problematics of European modernism Sheppard establishes the dialectical relationship between the cultural crisis that occurred during the period 1880 1936 and the different responses from European modernists and the avant garde With its combination of classic and new essays and its perspective on the theoretical avant garde modernism debate in the United States Sheppard s volume should give the specialist as well as the general reader an insight into the highest sample of European scholarly discourse on this subject **Schoolroom Poets** Angela Sorby,2005 A fresh and provocative approach to the popular schoolroom poets and the reading public who learned them by heart *Comparativism in Art History* Jas Elsner,2017-07-05 Featuring some of the major voices in the world of art history this volume explores the methodological aspects of comparison in the historiography of the discipline The chapters assess the strengths and weaknesses of comparative practice in the history of art and consider the larger issue of the place of comparative in how art history may develop in the future The contributors represent a comprehensive range of period and geographic command from antiquity to modernity from China and Islam to Europe from various forms of art history to archaeology anthropology and material culture studies Art history is less a single discipline than a series of divergent scholarly fields in very different historical geographic and cultural contexts but all with a visual emphasis on the close examination of objects These fields focus on different often incompatible temporal and cultural contexts yet nonetheless they regard themselves as one coherent discipline namely the history of art There are substantive problems in how the sub fields within the broad brush generalization called art history can speak coherently to each other These are more urgent since the shift from an art history centered on the western tradition to one that is consciously global **Resources in Education** ,1971 *Research in Education* ,1971-12 *Women's Liberation and the Dialectics of Revolution* Raya Dunayevskaya,1996 This collection of 35 years of Dunayevskaya s writings based on active participation interviews and meetings develops the dialectics of revolution which emerges from masses in motion including not only women and men but the forces of labour youth the black dimension and women s liberation **The Corporeal Turn** Maxine Sheets-Johnstone,2015-10-22 The purpose of The Corporeal Turn is to document in a single text the impressive array of investigations possible with respect to the body and bodily life and to show that whatever the specific topic being examined it is a matter of fathoming and elucidating complex and subtle structures of animate meaning The corporeal turn is envisioned as an ever expanding continuous and open ended spiral of inquiry in which deeper and deeper understandings are forged understandings that in each instance themselves call out for

deeper and deeper inquiries The first thirteen essays have already been published as distinct articles The two new essays constituting the final two chapters are testimony to this open ended spiral of inquiry **Begin Again** Kenneth

Modernities Julio Ramos,2001-06-22 With a Foreword by Jos David Sald var Since its first publication in Spanish nearly a decade ago Julio Ramos s Desencuentros de la modernidad en America Latina por el siglo XIX has been recognized as one of the most important studies of modernity in the western hemisphere Available for the first time in English and now published with new material Ramos s study not only offers an analysis of the complex relationships between history literature and nation building in the modern Latin American context but also takes crucial steps toward the development of a truly comparative inter American cultural criticism With his focus on the nineteenth century Ramos begins his genealogy of an emerging Latin Americanism with an examination of Argentinean Domingo Sarmiento and Chilean Andr s Bello representing the enlightened letrados of tradition In contrast to these lettered men he turns to Cuban journalist revolutionary and poet Jos Mart who Ramos suggests inaugurated a new kind of intellectual subject for the Americas Though tracing Latin American modernity in general it is the analysis of Mart particularly his work in the United States that becomes the focal point of Ramos s study Mart s confrontation with the unequal modernization of the New World the dependent status of Latin America and the contrast between Latin America s culture of elites and the northern mass culture of commodification are for Ramos key elements in understanding the complex Latin American experience of modernity Including two new chapters written for this edition as well as translations of three of Mart s most important works Divergent Modernities will be indispensable for

anyone seeking to understand development and modernity across the Americas The Idea of the Postmodern Hans Bertens, 2003-09-02 At last Everything you ever wanted to know about postmodernism but were afraid to ask Hans Bertens Postmodernism is the first introductory overview of postmodernism to succeed in providing a witty and accessible guide for the bemused student In clear and straightforward but always elegant prose Bertens sets out the interdisciplinary aspects the critical debates and the key theorists of postmodernism He also explains in thoughtful and illuminating language the relationship between postmodernism and poststructuralism and that between modernism and postmodernism An enjoyable and indispensable text for today's student **Hayden White** Herman Paul, 2013-04-29 This new book offers a clear and accessible exposition of Hayden White's thought In an engaging and wide ranging analysis Herman Paul discusses White's core ideas and traces the development of these ideas from the mid 1950s to the present Starting with White's medievalist research and youthful fascination for French existentialism Paul shows how White became increasingly convinced that historical writing is a moral activity He goes on to argue that the critical concepts that have secured White's fame trope plot discourse figural realism all stem from his desire to explicate the moral claims and perceptions underlying historical writing White emerges as a passionate thinker a restless rebel against scientism and a defender of existentialist humanist values This innovative introduction will appeal to students and scholars across the humanities and help develop a critical understanding of an increasingly important thinker The Law of the Heart Sam B. Girgus, 2014-07-03 The Law of the Heart is a vigorous challenge to the prevailing concept of the antidemocratic image of the self in the American literary and cultural tradition Sam B Girgus counters this interpretation and attempts to develop a new understanding of democratic individualism and liberal humanism in American literature under the rubric of literary modernism The image of the individual self who retreats inward conforming to a distorted law of the heart emerges from the works of such writers as Cooper and Poe and composer Charles Ives Yet as Girgus shows other American writers relate the idea of the self to reality and culture in a more complex way the self confronts and is reconciled to the paradox of history and reality In Girgus view the tradition of pragmatic humanistic individualism provides a foundation for a future where individual liberty is a major priority He uses literary modernism as a bridge for relating contemporary social conditions to crises of the American self and culture as seen in the works of writers including Emerson Howells Whitman Henry James William James Fitzgerald Bellow and McLuhan

Entropy Exhibition (Routledge Revivals) Colin Greenland, 2013-01-11 When first published in 1983 The Entropy Exhibition was the first critical assessment of the literary movement known as New Wave science fiction It examines the history of the New Worlds magazine and its background in the popular imagination of the 1960s traces the strange history of sex in science fiction and analyses developments in stylistic theory and practice Encyclopedia of Contemporary Literary Theory Irene Rima Makaryk, 1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline As with any body of scholarship various schools of thought exist and sometimes conflict within it I R Makaryk

has compiled a welcome guide to the field Accessible and jargon free the Encyclopedia of Contemporary Literary Theory provides lucid concise explanations of myriad approaches to literature that have arisen over the past forty years Some 170 scholars from around the world have contributed their expertise to this volume Their work is organized into three parts In Part I forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose The essays also discuss the uses and limitations of the various schools and the key issues they address Part II focuses on individual theorists It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context Part III deals with the vocabulary of literary theory It identifies significant complex terms places them in context and explains their origins and use Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture

First Martyr of Liberty Mitch Kachun, 2017-06-20 First Martyr of Liberty explores how Crispus Attucks's death in the 1770 Boston Massacre led to his achieving mythic significance in African Americans struggle to incorporate their experiences and heroes into the mainstream of the American historical narrative While the other victims of the Massacre have been largely ignored Attucks is widely celebrated as the first to die in the cause of freedom during the era of the American Revolution He became a symbolic embodiment of black patriotism and citizenship This book traces Attucks's career through both history and myth to understand how his public memory has been constructed through commemorations and monuments institutions and organizations bearing his name juvenile biographies works of poetry drama and visual arts popular and academic histories and school textbooks There will likely never be a definitive biography of Crispus Attucks since so little evidence exists about the man's actual life While what can and cannot be known about Attucks is addressed here the focus is on how he has been remembered variously as either a hero or a villain and why at times he has been forgotten by different groups and individuals from the eighteenth century to the present day

Challenging Modernity Mark A. Pegrum, 2000-04-01 When Dada burst onto the European stage in 1916 it shocked and scandalized the public of its day with art forms ideas and attitudes which were so revolutionary that it is only in recent decades that they have begun to find recognition within the broad cultural movement known as postmodernism In fact many postmodern artistic and intellectual tendencies can be seen to have descended via an underground tradition from the experiments of the Dadaists earlier this century Yet the existence of this close link has been largely neglected by scholars This book for the first time examines in depth the link between modernism and postmodernism and demonstrates the extensive similarities as well as the few crucial differences between the ideas and art of the Dadaists on the one hand and those of contemporary postmodern thinkers and artists on the other Although they

did not have access to postmodern terminology it is clear that many Dadaists were essentially attempting to escape constrictive Enlightenment and modernist structures in order to create a proto postmodern space of difference otherness and flux Their successes failures and compromises in this respect are very illustrative for anyone interested in the progress of our own intellectual and artistic culture in its wavering between modern and postmodern This book offers a much needed historical perspective and solid basis for the on going debate on postmodernism *Trotsky, Trotskyism and the Transition to Socialism* Peter Beilharz, 2019-11-19 First published in 1987 Trotskyists have long dominated the revolutionary tradition on the Western left Written from a critical socialist standpoint this book provides an analysis of Trotskyism and argues that Trotskyism is increasingly irrelevant as a means of achieving socialism It argues that as the realisation grows that the revolutionary tradition and the authoritarianism which necessarily result from it are wrong the importance of the problem of the transition to socialism increases It argues that on this point Trotskyism is weak that Trotskyism's proposals for socialist transition are largely rhetorical and that its democratic impulse is weak It supports this argument by showing that Trotsky's philosophy of history implicit in his writings which the author characterises as evolutionary and necessitarian coupled with a failure to grasp the moral basis of the socialist case has a disabling effect on Trotsky's account of the transition to socialism and on his explanation of Stalinism Moreover it argues that Trotsky's intellectual and political heirs have been unable to escape from the contradictions inherent in his thought
