Daily Life during the Black Death Joseph P. Byrne,2006-08-30 Daily life during the Black Death was anything but normal When plague hit a community every aspect of life was turned upside down from relations within families to its social political and economic structure Theaters emptied graveyards filled and the streets were ruled by the terrible corpse bearers whose wagons of death rumbled day and night Daily life during the Black Death was anything but normal During the three and a half centuries that constituted the Second Pandemic of Bubonic Plague from 1348 to 1722 Europeans were regularly assaulted by epidemics that mowed them down like a reaper s scythe When plague hit a community every aspect of life was turned upside down from relations within families to its social political and economic structure Theaters emptied graveyards filled and the streets were ruled by terrible corpse bearers whose wagons of death rumbled night and day Plague time elicited the most heroic and inhuman behavior imaginable And yet Western Civilization survived to undergo the Renaissance Reformation Scientific Revolution and early Enlightenment In Daily Life during the Black Death Joseph Byrne opens with an outline of the course of the Second Pandemic the causes and nature of bubonic plague and the recent revisionist view of what the Black Death really was He presents the phenomenon of plague thematically by focusing on the places people lived and worked and confronted their horrors the home the church and cemetery the village the pest houses the streets and roads He leads readers to the medical school classroom where the false theories of plague were taught through the careers of doctors who futilely treated victims to the council chambers of city hall where civic leaders agonized over ways to prevent and then treat the pestilence He discusses the medicines prayers literature special clothing art burial practices and crime that plague spawned Byrne draws vivid examples from across both Europe and the period and presents the words of witnesses and victims themselves wherever possible He ends with a close discussion of the plague at Marseille 1720 22 the last major plague in northern Europe and the research breakthroughs at the end of the nineteenth century that finally defeated bubonic plague      **Perspectives on Garden Histories** Michel Conan,1999 Garden history is a discipline of contested purposes Perspectives on Garden Histories contributes to a self critical examination of this emergent field of study at the same time offering an overview of its main achievements in several domains such as Italian and Mughal gardens and of the new kinds of investigation to which they have led In its early years garden history centered on architectural studies of garden design but in the 1960s the emphasis shifted from garden design to garden meaning The new paradigm considered gardens as complex works of art and demanded an extensive documentation of the historical context as well as of the figurative and discursive

sources This approach in its turn was challenged by neo Marxist scholars who proceeded to view landscape appreciation as an ideological superstructure an outgrowth of agricultural production processes Garden designs and their histories can also be viewed as expressions of ideological conflicts in society Neither gardens nor their history can thus be studied independently of the social cultural and political movements that give prominence to the contested ideologies Gardens can be used to foster some ideologies or reflect a reaction against a social change Comparative research offers another fascinating approach exploring the relations between European landscape concepts and other cultural contexts and discussing issues of cultural dominance and interpretation The emergence of various perspectives has led to the incorporation of further questions into the domain of garden studies which has been moving in new directions and using new methods in search of an adapted theoretical framework This volume offers a striking view of changes taking place in the discipline

*The Intellectual Life of Western Europe in the Middle Ages* Dales,2022-04-19 This work presents a connected account of western European thought from the Patristic age to the mid fourteenth century Dales aims to keep his reader close to the sense of the texts which he translates frequently at some length or summarizes in his exposition He attempts to include important matters which are generally omitted in broad treatments the chapter on the tenth century is the longest in the book but the author s choice of topics is fully justified by his special intimacy with what he elects to discuss particularly the hexameral tradition ancient and medieval the scientific tradition twelfth century treatises on nature and cosmology discussions of the eternity of the world and the thought of Robert Grosseteste This adds a personal and distinctive character to the work Dales stresses throughout the diversity and vigor of medieval thought qualities which he illustrates widely from Latin and vernacular poetry and literature of various kinds as well as from philosophical and theological texts
