Forgotten Impulses:

PSYCHOLOGY HARDEEP KAUR SHERGILL, 2010-05-25 Designed for the undergraduate students of psychology this comprehensive text presents the fundamental principles and concepts of psychology. It discusses in detail various human behavioural patterns. The book describes the nature, goals and different schools of psychology. It explains various methods of psychological research such as experimental observation, interview, questionnaire and case study methods. Besides describing the biological bases of human behaviour, it examines different types of psychological tests which are conducted to differentiate one individual from another. This student-friendly book also elaborates the processes of learning and memory, the nature and types of memory and other important aspects of human behaviour such as motivation, emotion and intelligence. The James-Lange and Cannon-Bard theories of emotion, psychometric theory and cognitive theory of intelligence are also thoroughly dealt with. Finally, different concepts of personality and techniques of assessment of personality are explained. Key Features: Includes a number of figures and illustrations to clarify the concepts. Gives interesting facts and health tips. Provides chapter-end exercises for practice. Offers several examples for easy understanding of the subject matter.

Psychopathologies of the Living Patrick ffrench, Nigel Saint, 2025-09-17 Psychopathologies of the Living makes the work of the French psychoanalyst Pierre F. Dida (1934-2002) available in English for the first time. Patrick ffrench and Nigel Saint present key essays selected from F. Dida's extensive oeuvre. The book directs attention to two salient dimensions of F. Dida's writing: his attention to the pathologies of the body considered as both a psychic and somatic entity and his insistence on the relevance of psychoanalytic thought to the sciences of life. The chapters included in this collection detail F. Dida's creative use of aesthetic sources in his psychoanalytic work, his distinctive and creative manipulation and revision of central psychoanalytic concepts and his precise attention to the texts of Freud, Ferenczi and Winnicott among others. This selection of F. Dida's essays also shows his avoidance of thematisation or explicit theorisation. For F. Dida, the theory of psychoanalysis must arise out of the specific interplay of language and the space of the session. Psychopathologies of the Living will be of great interest to psychoanalysts in practice and in training and to academics and scholars of philosophy, aesthetics and literary studies.
