Form and Function in the Brain and Spinal Cord Stephen G. Waxman, 2003-01-24 This book reflects Stephen Waxman's three decades of research on the form and functions of the brain and spinal cord. Building on his experience as a neuroscientist studying model systems as primitive as eels and as a neurologist studying humans, Waxman discusses a wide variety of topics including the design principles that optimize neural function, molecular and cellular substrates of behavior, the role of glial cells in the brain, the molecular basis for pain, plasticity in the brain and spinal cord, strategies for promoting functional recovery in disorders such as multiple sclerosis, spinal cord injury and stroke, and prospects for rebuilding the brain and spinal cord. The pieces provide example after example of the elegance of design of the nervous system of the intricate interplay between structure and function in health and disease and of the rich borderland between neuroscience and neurology.

Why You Like It Nolan Gasser, 2019-04-30 From the chief architect of the Pandora Radio's Music Genome Project comes a definitive and groundbreaking examination of why we respond to music the way we do. Everyone loves music. But what is it that makes music so universally beloved and have such a powerful effect on us? In this sweeping and authoritative book, Dr. Nolan Gasser, a composer, pianist, and musicologist and the chief architect of the Music Genome Project which powers Pandora Radio, breaks down what musical taste is, where it comes from, and what our favorite songs say about us. Dr. Gasser delves into the science, psychology, and sociology that explains why humans love music so much, how our brains process music, and why you may love Queen but your best friend loves Kiss. He sheds light on why babies can clap along to rhythmic patterns and reveals the reason behind why different cultures around the globe identify the same kinds of music as happy, sad, or scary. Using easy-to-follow notated musical scores, Dr. Gasser teaches music fans how to become engaged listeners and provides them with the

tools to enhance their musical preferences He takes readers under the hood of their favorite genres pop rock jazz hip hop electronica world music and classical and covers songs from Taylor Swift to Led Zeppelin to Kendrick Lamar to Bill Evans to Beethoven and through their work Dr Gasser introduces the musical concepts behind why you hum along tap your foot and feel deeply Why You Like It will teach you how to follow the musical discourse happening within a song and thereby empower your musical taste so you will never hear music the same way again *Neurology & Neuroscience* Richard T.
