   Formal Description Techniques, IV K.R. Parker,G.A. Rose,2013-10-22 Formality is becoming accepted as essential in the development of complex systems such as multi layer communications protocols and distributed systems Formality is mandatory for mathematical verification a procedure being imposed on safety critical system development Standard documents are also becoming increasingly formalised in order to capture notions precisely and unambiguously This FORTE 91 proceedings volume has focussed on the standardised languages SDL Estelle and LOTOS while as with earlier conferences remaining open to other notations and techniques thus encouraging the continuous evolution of formal techniques This useful volume contains 29 submitted papers three invited papers four industry reports and four tool reports organised to correspond with the conference sessions   Formal Description Techniques IX R. Gotzhein,J. Bredereke,2016-01-09 This book is the combined proceedings of the latest IFIP Formal Description Techniques FDTs and Protocol Specification Testing and Verification PSTV series It addresses FDTs applicable to communication protocols and distributed systems with special emphasis on standardised FDTs It features state of the art in theory application tools and industrialisation of formal description   Formal Description Techniques VIII Gregor von Bochmann,Rachida Dssouli,Omar Rafiq,2016-01-09 This volume contains the latest worldwide research results on formal description techniques applicable to telecommunications covering their theoretical foundations industrial applications and practical usage The book presents the selected proceedings of the eighth International Conference on Formal Description Techniques arranged by the International Federation for Information Processing and held in Montreal Canada October 1995   Formal Description Techniques and Protocol Specification, Testing and Verification Atsushi Togashi,Tadanori Mizuno,Norio Shiratori,Teruo Higashino,2013-06-05 FORTE PSTV 97 addresses Formal Description Techniques FDTs applicable to Distributed Systems and Communication Protocols such as Estelle LOTOS SDL ASN 1 TTCN Z Automata Process Algebra Logic The conference is a forum for presentation of the state of the art in theory application tools and industrialization of FDTs and provides an excellent orientation for newcomers

   LOTOSphere: Software Development with LOTOS Tommaso Bolognesi,Jeroen van de Lagemaat,Chris Vissers,2012-12-06 LOTOS Language Of Temporal Ordering Specification became an international standard in 1989 although application of preliminary versions of the language to communication services and protocols of the ISO OSI family dates back to 1984 This history of the use of LOTOS made it apparent that more advantages than the pure production of standard reference documents were to be expected from the use of such formal description techniques LOTOSphere Software Development with LOTOS describes in depth a five year project that moved LOTOS out of the ISO tower into software engineering practice LOTOS became a vehicle for efficient yet formally based industrial software specification design verification implementation and testing LOTOSphere Software Development with LOTOS is divided into six parts The first introduces the reader to LOTOS and the project LOTOSphere The five remaining each treat an important part of the software development life cycle

using LOTOS This is the first book to give a comprehensive treatment of the use of these formal description techniques in a software engineering environment It will thus be a valuable reference for researchers and software developers and can also be used as a text for an advanced course on the subject **Formal Methods for Distributed Processing** Howard Bowman,John Derrick,2001-10-22 Originally published in 2002 this book presents techniques in the application of formal methods to object based distributed systems A major theme of the book is how to formally handle the requirements arising from OO distributed systems such as dynamic reconfiguration encapsulation subtyping inheritance and real time aspects These may be supported either by enhancing existing notations such as UML LOTOS SDL and Z or by defining fresh notations such as Actors Pi calculus and Ambients The major specification notations and modelling techniques are introduced and compared by leading researchers The book also includes a description of approaches to the specification of non functional requirements and a discussion of security issues Researchers and practitioners in software design object oriented computing distributed systems and telecommunications systems will gain an appreciation of the relationships between the major areas of concerns and learn how the use of object oriented based formal methods provides workable solutions

Formal Techniques for Networked and Distributed Systems Myungchul Kim,Byoungmoon Chin,Sungwon Kang,Danhyung Lee,2006-04-11 FORTE 2001 formerly FORTE PSTV conference is a combined conference of FORTE Formal Description Techniques for Distributed Systems and Communication Protocols and PSTV Protocol Specification Testing and Verification conferences This year the conference has a new name FORTE Formal Techniques for Networked and Distributed Systems The previous FORTE began in 1989 and the PSTV conference in 1981 Therefore the new FORTE conference actually has a long history of 21 years The purpose of this conference is to introduce theories and formal techniques applicable to various engineering stages of networked and distributed systems and to share applications and experiences of them This FORTE 2001 conference proceedings contains 24 refereed papers and 4 invited papers on the subjects We regret that many good papers submitted could not be published in this volume due to the lack of space FORTE 2001 was organized under the auspices of IFIP WG 6 1 by Information and Communications University of Korea It was financially supported by Ministry of Information and Communication of Korea We would like to thank every author who submitted a paper to FORTE 2001 and thank the reviewers who generously spent their time on reviewing Special thanks are due to the reviewers who kindly conducted additional reviews for rigorous review process within a very short time frame We would like to thank Prof Guy Leduc the chairman of IFIP WG 6 1 who made valuable suggestions and shared his experiences for conference organization

This volume comprises the proceedings of the Fourth International Workshop on Formal Methods for Open Object Based Distributed Systems FMOODS 2000 which was sponsored by the International Federation for Information Processing IFIP and held in Stanford California USA in September 2000   Protocols for High Speed Networks IV G. Neufeld,M. Ito,2013-11-11 Welcome to the fourth IFIP workshop on protocols for high speed networks in Vancouver This workshop follows three very successful workshops held in Ziirich 1989 Palo Alto 1990 and Stockholm 1993 respectively We received a large number of papers in response to our call for contributions This year forty papers were received of which sixteen were presented as full papers and four were presented as poster papers Although we received many excellent papers the program committee decided to keep the number of full presentations low in order to accommodate more discussion in keeping with the format of a workshop Many people have contributed to the success of this workshop including the members of the program committee who with the additional reviewers helped make the selection of the papers We are thankful to all the authors of the papers that were submitted We also thank several organizations which have contributed financially to this workshop specially NSERC ASI CICSR UBC MPR Teltech and Newbridge Networks   **Formal Description Techniques and Protocol Specification, Testing and Verification** Stan Budkowski,Ana Cavalli,Elie Najm,2013-04-17 Formal Description Techniques and Protocol Specification Testing and Verification addresses formal description techniques FDTs applicable to distributed systems and communication protocols It aims to present the state of the art in theory application tools and industrialization of FDTs Among the important features presented are FDT based system and protocol engineering FDT application to distributed systems Protocol engineering Practical experience and case studies Formal Description Techniques and Protocol Specification Testing and Verification comprises the proceedings of the Joint International Conference on Formal Description Techniques for Distributed Systems and Communication Protocols and Protocol Specification Testing and Verification sponsored by the International Federation for Information Processing held in November 1998 Paris France Formal Description Techniques and Protocol Specification Testing and Verification is suitable as a secondary text for a graduate level course on Distributed Systems or Communications and as a reference for researchers and practitioners in industry   **Using Formal Description Techniques** Kenneth J. Goldsack,Stuart J.H. Kent,2012-12-06 Rationale Software engineering aims to develop software by using approaches which en able large and complex program suites to be developed in a systematic way However it is well known that it is difficult to obtain the level of assurance of correctness required for

safety critical software using old fashioned program ming techniques The level of safety required becomes particularly high in software which is to function without a break for long periods of time since the software cannot be restarted and errors can accumulate Consequently programming for mission critical systems for example needs to address the requirements of correctness with particular care In the search for techniques for making software cheaper and more reliable two important but largely independent influences have been visible in recent years These are Object Technology Formal Methods First it has become evident that objects are and will remain an important concept in software Experimental languages of the 1970 s introduced various concepts of package cluster module etc giving concrete expression to the importance of modularity and encapsulation the construction of software com ponents hiding their state representations and algorithmic mechanisms from users exporting only those features mainly the procedure calling mechanisms which were needed in order to use the objects This gives the software com ponents a level of abstraction separating the view of what a module does for the system from the details of how it does them **Formal Approaches to Agent-Based Systems** James L. Rash,Christopher A. Rouff,Walter Truszkowski,Diana Gordon,Michael G. Hinchey,2003-06-29 This book constitutes the thoroughly refereed post proceedings of the First International Workshop on Formal Approaches to Agent Based Systems FAABS 2000 held in Greenbelt MD USA in April 2000 The 22 revised full papers presented together with 13 posters and two panel discussion reports were carefully reviewed and improved for inclusion in the book The papers are organized in topical sections on verifying agents mental states synthesizing agents initially frameworks and formalizations modeling and execution inter agent communication and adaptive agents **Information Networks and Data Communication** Finn Arve Aagesen,Harald Botnevik,Dipak Khakhar,2016-01-09 Teleservice is a common concept for distributed application services related to the use of telecommunication equipment PCs workstations and mainframes Teleservices represent a diversity of applications related to various user and vendor cultures such as traditional telecommunications services E mail services cooperative work applications multimedia applications mobile services and intelligent network services The complexity and diversity of teleservices are increasing but of greater importance is the change in the way in which teleservices are designed delivered and maintained Information Network and Data Communications captures the cultural as well as the technical variety of teleservice **A Journey from Process Algebra via Timed Automata to Model Learning** Nils Jansen,Mariëlle Stoelinga,Petra van den Bos,2022-09-06 This Festschrift dedicated to Frits W Vaandrager on the occasion of his 60th birthday contains papers written by many of his closest collaborators Frits has been a Professor of Informatics for Technical Applications at Radboud University Nijmegen since 1995 where his research focuses on formal methods concurrency theory verification model checking and automata learning The volume contains contributions of colleagues Ph D students and researchers with whom Frits has collaborated and inspired reflecting a wide spectrum of scientific interests and demonstrating successful work at the highest levels of both theory and practice
