 Button,Toni Reed,1999-11-30 While England has been strengthened by a proud isolationism she has simultaneously been
 enriched by the economic social and political complexities that have emerged as people of different ethnic and cultural
 backgrounds have moved within her borders or when her own citizens have emigrated among those foreigners to live or rule
 This book explores the foreign element in English culture and the attempt by English writers from the early 19th to the mid
 20th century to portray their complex and often ambiguous responses to that doubly foreign element among them the foreign
 woman While being foreign may begin with national or ethnic difference the contributors to this book expand it to include
 other forms of alienation from a dominant culture resulting from gender race class ideology or temperament The many
 factors shaping English national identity including British imperialism immigration patterns English family and social
 structures and English common law have been shaped by gender related issues Though not a prominent literary figure the
 foreign woman in England has received increasingly critical attention in recent years as a psychological and sociological
 phenomenon By beginning with Byron in the early 19th century and concluding with Lawrence Durrell in the 20th century
 this study contributes to a more comprehensive vision of the foreign woman as she is portrayed by a number of British
 authors including Shelley Wordsworth Charlotte Bront Elizabeth Barrett Browning Wilkie Collins George Eliot Joseph Conrad
