Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology, 1983 The Inter-American Foundation and the Small and Micro-enterprise Sector Robert G. Blayney, 1988 **The Moral Foundation of Economic Behavior** David C. Rose, 2011-08-01 This book explains why moral beliefs can and likely do play an important role in the development and operation of market economies It provides new arguments for why it is important that people genuinely trust others even those whom they know don't particularly care about them because in key circumstances institutions are incapable of combating opportunism It then identifies specific characteristics that moral beliefs must have for the people who possess them to be regarded as trustworthy When such moral beliefs are held with sufficient conviction by a sufficiently high proportion of the population a high trust society emerges that supports maximum cooperation and creativity while permitting honest competition at the same time Such moral beliefs are not tied to any particular religion and have nothing to do with moral earnestness or the set of moral values what matters is how they affect the way people think about morality Such moral beliefs are based on abstract ideas that must be learned so they are matters of culture not genes and are therefore able to explain differences in economic performance across societies The Physical and Economic Foundation of Natural Resources United States. Congress. House. Committee on Interior and Insular Affairs, 1952 Cornerstone or Sandy Foundation Dong Qiu, Dongju Li, 2021-08-04 Social and economic empirical research especially the judgment of national power is especially important whose foundation economic statistics we need to make a professional review of This book introduces the existing research results of foreign and domestic economic statistics analyzes its intrinsic value and application significance reveals various professional misunderstandings and index misreading that are widely spread in society manifests various measurement traps implied in empirical application summarizes four basic contradictions that economic measurement is difficult to avoid in particular its possible impact on the data results and empirical conclusions and
