Introduction to Maple Andre HECK, 2011-06-27 The first two editions of this book have been very well received by the community, but so many revisions of the Maple system have occurred since then that simply reprinting the out-of-stock book would not do anymore. A major revision of the book was inevitable too. The wording major revision must be taken seriously because I not only corrected typographical errors, rephrased text fragments, and updated many examples, but I also rewrote complete chapters and added new material. In particular, the chapter on differential equations now discusses Lie symmetry methods, partial differential equations, and numerical methods. Linear algebra is based throughout the book on the packages LinearAlgebra and VectorCalculus, which replace the deprecated package linalg. Maple users are strongly advised to do their work with the new packages. The chapter on simplification has been updated and expanded; it discusses the use of

assumptions in more detail now Last but not least a new chapter on Grabner basis theory and the Groebner package in Maple has been added to the book It includes many applications of Grabner basis theory Many of the Maple sessions have been rewritten so that they comply with the most recent version of Maple As a result of all this work hardly any section in the book has been left untouched vi Preface to the Third Edition From the Preface of the Second Edition The first edition of this book has been very well received by the community

The Oxford Handbook of Contemporary Middle Eastern and North African History Jens Hanssen, Amal N. Ghazal, 2020-11-30 The Oxford Handbook of Contemporary Middle Eastern and North African History critically examines the defining processes and structures of historical developments in North Africa and the Middle East over the past two centuries The Handbook pays particular attention to countries that have leapt out of the political shadows of dominant and better studied neighbours in the course of the unfolding uprisings in the Middle East and North Africa These dramatic and interconnected developments have exposed the dearth of informative analysis available in surveys and textbooks particularly on Tunisia Libya Yemen Bahrain and Syria
