## Gene-Linked Abnormalities

Name	Description	Treatment	Incidence
Cystic fibrosis	Glandular dysfunction that interferes with mucus production; breathing and digestion are hampered, resulting in a shortened life span.	Physical and oxygen therapy, synthetic enzymes, and antibiotics; most individuals live to middle age.	1 in 2,000 births
Diabetes	Body does not produce enough insulin, which causes abnormal metabolism of sugar.	Early onset can be fatal unless treated with insulin.	1 in 2,500 births
Hemophilia	Delayed blood clotting causes internal and external bleeding.	Blood transfusions/injections can reduce or prevent damage due to internal bleeding.	1 in 10,000 males
Huntington disease	Central nervous system deteriorates, producing problems in muscle coordination and mental deterioration.	Does not usually appear until age 36 or older; death likely 10 to 20 years after symptoms appear.	1 in 20,000 births
Phenylketonuria (PKU)	Metabolic disorder that, left untreated, causes mental retardation.	Special diet can result in average intelligence and normal life span.	1 in 10,000 to 1 in 20,000 births
Sickle-cell anemia	Blood disorder that limits the body's oxygen supply; it can cause joint swelling, as well as heart and kidney failure.	Painkillers, medication for pain, antibiotics, and blood transfusions.	1 in 400 African American children (lower among other groups)
Spina bifida	Neural tube disorder that causes brain and spine abnormalities.	Corrective surgery at birth, orthopedic devices, and physical/medical therapy.	2 in 1,000 births
Tay-Sachs disease	Deceleration of mental and physical development caused by an accumulation of lipids in the nervous system.	Medication and special diet are used, but death is likely by 5 years of age.	One in 20 American Jews is a carrier.

**Foundations of Developmental Genetics** Dorian J. Pritchard, 1986

**Foundations of Developmental Psychology**

Richard C. LaBarba, 2013-09-25 Foundations of Developmental Psychology is designed for the student seeking a comprehensive introduction to developmental psychology as a developmental science. The intent is to introduce the field in a manner comparable to the introductory courses that college students take in biology, chemistry, or physics. The emphasis is on the empirical and theoretical foundations of fundamental human development. The book attempts to trace the origins and processes of various developmental events. Developmental phenomena are presented by topics rather than by chronological age-related patterns of development. This arrangement of the subject matter provides for more efficient study integration and synthesis of the material along with a more organized view of development. Key topics discussed include the genetic foundations of development, prenatal factors in development, the biological notion of maturation and its significance for development, motor and perceptual development, and cognitive, intellectual, language, emotional, personality, and social development. Although this text is written for undergraduate students in psychology, it can be understood by students in any discipline who have a grasp of introductory psychology and biology.

*Principles of Developmental Genetics* Sally A. Moody, 2014-09-02 Providing expert coverage of all major events in early embryogenesis and the organogenesis of specific systems and supplemented with representative clinical syndromes. Principles of Developmental Genetics, Second Edition discusses the processes of normal development in embryonic and prenatal animals, including humans. The new edition of this classic work supports clinical researchers developing future therapies with its all-new coverage of systems biology, stem cell biology, new technologies, and clinical disorders. A crystal clear layout, exceptional full-color design, and bulleted summaries of major takeaways and clinical pathways assist comprehension and readability of the highly complex content. All new coverage of systems biology and stem cell biology in context of evolving technologies places the work squarely on the modern sciences. Chapters are complemented with a bulleted summary for easy digestion of the major points, with a clinical summary for therapeutic application. Clinical highlights provide a bridge between basic developmental biology and clinical sciences in embryonic and prenatal syndromes.

Genetics Fundamentals Notes Debasish Kar, Sagartirtha Sarkar, 2022-10-06 This up-to-date and comprehensive textbook is essential reading material for advanced undergraduate and graduate students with a course module in genetics and developmental biology. The book provides clear, concise, and rigorous foundational concepts of genetics. It opens with an introductory chapter that provides an overview of genetics. The book includes separate and detailed sections on classical genetics, molecular genetics, and population genetics. It covers basic and foundational principles such as Mendelian genetics, chromosomal theory, transcription, translation, mutation, and gene regulation. It further includes chapters on advanced topics such as molecular genetic techniques, genomics, and applied molecular genetics. The concluding section includes chapters on population genetics, developmental genetics, and evolutionary genetics. The chapters are written by

authors with in depth knowledge of the field The book is replete with interesting examples case studies questions and suggested reading It is useful to students and course instructors in the field of human genetics developmental biology life sciences and biotechnology It is also meant for researchers who wish to further their understanding about the fundamental concepts of genetics *Developmental Genetics* Gurbachan S. Miglani, 2013-12-30 Development is behind what one looks like It is directed by genes the units of heredity which are made up to deoxyribonucleic acid DNA in all animals including man plants microorganisms and most of the viruses except in some viruses where ribonucleic acid RNA is the genetic material Developmental Genetics integrates the two disciplines of development and genetics into one Key Features Each chapter begins with a brief introduction and historical background The text explains both classical and recent material Various phenomena of developmental genetics explained with examples of animals plant bacteria and viruses Text explained with suitable examples illustrations tables and figures List of references and review questions given at the end of each chapter Exhaustive glossary author index and subject index given at the end of the book This book is essential reading for postgraduate in developmental genetics teachers teaching this subject and developmental biologists conducting research in this area It is also suitable for candidates preparing for ARS UGC NET examination **Development, Genetics, and Psychology** Robert Plomin, 1986 First Published in 1986 Routledge is an imprint of Taylor Francis an informa company

**Hierarchical Genome And Differentiation Waves, The: Novel Unification Of Development, Genetics And Evolution (In 2 Volumes)** Richard Gordon, 1999-07-12 Over the past few decades numerous scientists have called for a unification of the fields of embryo development genetics and evolution Each field has glaring holes in its ability to explain the fundamental phenomena of life In this book the author shows how the phenomenon of cell differentiation considered in its temporal and spatial aspects during embryogenesis provides a starting point for a unified theory of multicellular organisms plants fungi and animals including their evolution and genetics This unification is based on the recent discovery of differentiation waves by the author and his colleagues described in the appendices and illustrated by a flip movie prepared by a medical artist To help the reader through the many fields covered a glossary is included This book will be of great value to the researcher and practicing doctors scientists alike The research students will receive an in depth tutorial on the topics covered The seasoned researcher will appreciate the applications and the gold mine of other possibilities for novel research topics **Lifespan Development** Tara L.
