Hms Vanguard:

The Last British Battleship R. A. Burt, 2019-03-30 Lots of information on the ship's design weapons armor refits and service career along with the Royal Cruise of 1947 Model Ship World The ninth HMS Vanguard bearing one of the most illustrious names in the Royal Navy with honors from the Armada to Jutland was the last and largest of Britain's battleships and was commissioned in 1946 Her design evolved from the King George V class and incorporated much of the fully developed design for the two battleships Lion and Temeraire that were laid down in 1939 but never completed At 813ft length overall and 42 300 tons she was the last battleship to be built for the Royal Navy and the only ship of her class She was built during the Second World War and incorporated existing twin 15in mountings and was part of the Royal Navy's response to the combined and increasing number of German and Japanese battleships in the early 1940s Immediately recognizable by her transom stern and high flared bow she had fine sea keeping ability Her appearance after the end of hostilities however and her huge crew requirements proved a conundrum for the Royal Navy her most significant role being that of Royal Yacht during the royal family's tour of South Africa in 1947 She was broken up at Faslane in 1960 In this book her design construction and career are all covered Armor machinery power plants and weaponry are examined in detail and the author has produced some 35 superb plans profiles and other line drawings The text is further enhanced by the addition of some 80 photos many in color from his collection R A Burt's earlier three volumes are regarded as definitive works on the subject of British battleships before 1945 with this new book he finally completes the story of the Dreadnought era bringing to life the last of a magnificent type of vessel of which the world will not see again The British Battleship HMS Vanguard Witold Koszela, 2022-01-31 The British battleship HMS Vanguard was built in the years 1941-1946 at the John Brown Company shipyard in Clydebank It was quite an unusual ship due to the fact that it was built as the largest and also the last of the British battleships and armed with artillery towers stored since 1925 taken from the cruisers HMS Courageous and HMS Glorious It is widely regarded as Britain's best designed battleship well armed but also least needed Design work began before World War II and was completed a year after its end making it one of the longest built ships in history Her service however was quite short and lacking of interesting events The unit was launched in 1944 and it entered service only two years later so it did not have the opportunity to take part in World War II The first major event in the history of the ship was the three month journey to the British dominion of the Union of South Africa with George VI Queen Mary and both daughters Princess Elizabeth and Anne on board between February and May 1947 **The British Battle Fleet** Frederick Thomas Jane, 1915 *The Annual Register*, 1876 **H.M.S. in the Great War Stephen Wynn, 2016-10-31 Gravesend was like most other towns in the UK during the course of the First World War When the call came to serve King and Country local men enlisted in their thousands but sadly not all of them returned This book gives an insight into the Tilbury to Gravesend Pontoon Bridge which allowed the rapid deployment of troops in the event of a German invasion along the East Coast It provided a quicker route to get troops equipment and supplies from Essex into Kent for transportation across to France It looks at the role both New Tavern and Shornemead Fort part of the London Defence system played in preventing the German Navy from carrying out direct attacks on London There is an account of the Gravesend riots in which groups of local people burnt and looted premises they believed belonged to German aliens who were residents in the town and the unique story of Captain Robert Campbell taken as a prisoner by the Germans early in the war He was allowed home by the Kaiser to see his dying mother one last time and voluntarily returned to captivity in Germany on his word of honour to do so The story of Sir Gilbert Parker the wartime MP for Gravesend is also told He was instrumental in convincing America to join the war as a British Allie which was no easy task as the United States Justice Department estimated there were some 480 000 Germans living in America at the time The book also tells the individual stories of Gravesend s men who fought in the war some who survived and returned to their loved ones and others who were not so fortunate It documents the triumphs and tragedies of Gravesend s people as they sought to find normality amongst a reality far removed from anything they had ever known before *Memoirs of the Life and Services of Rear-Admiral Sir William Symonds ...* Sir William Symonds, James A.
