approach to age discrimination theory can improve legal reasoning in age discrimination cases by articulating the relevant principles and competing interests that are at stake in age discrimination claims In constructing the theory the book adopts the reflective equilibrium method This requires that we examine our initial moral beliefs about age discrimination by seeking coherence with beliefs we have about similar moral and philosophical issues and revising the initial beliefs as a result of challenges to them In applying this method the book identifies the following five principles to form a pluralist theory of age discrimination equality of opportunity social equality respect autonomy and efficiency

study finds that it was through collective activity by workers through savings clubs friendly societies and union activity that the working class were originally able to take holidays and it was as a result of collective bargaining and campaigning that paid holidays were eventually secured for all Cincinnati Magazine ,1982-12 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region
