Flaherty, Hamdesa Tusso, 2016-11-21 The profession of peacemaking has been practiced by indigenous communities around the world for many centuries however the ethnocentric world view of the West which dominated the world of ideas for the last five centuries dismissed indigenous forms of peacemaking as irrelevant and backward tribal rituals Neither did indigenous forms of peacemaking fit the conception of modernization and development of the new ruling elites who inherited the postcolonial state The new profession of Alternative Dispute Resolution ADR which emerged in the West as a new profession during the 1970s neglected the tradition and practice of indigenous forms of peacemaking The scant literature which has appeared on this critical subject tends to

focus on the ritual aspect of the indigenous practices of peacemaking The goal of this book is to fill this lacuna in scholarship More specifically this work focuses on the process of peacemaking exploring the major steps of process of peacemaking which the peacemakers follow in dislodging antagonists from the stage of hostile confrontation to peaceful resolution of disputes and eventual reconciliation The book commences with a critique of ADR for neglecting indigenous processes of peacemaking and then utilizes case studies from different communities around the world to focus on the following major themes the basic structure of peacemaking process change and continuity in the traditions of peacemaking the role of indigenous women in peacemaking the nature of the tools peacemakers deploy common features found in indigenous processes of peacemaking and the overarching goals of peacemaking activities in indigenous communities Indigenous Research Deborah McGregor, Jean-Paul Restoule, Rochelle Johnston, 2018-08-15 Indigenous research is an important and burgeoning field of study With the Truth and Reconciliation Commission's call for the Indigenization of higher education and growing interest within academic institutions scholars are exploring research methodologies that are centred in or emerge from Indigenous worldviews epistemologies and ontology This new edited collection moves beyond asking what Indigenous research is and examines how Indigenous approaches to research are carried out in practice Contributors share their personal experiences of conducting Indigenous research within the academy in collaboration with their communities and with guidance from Elders and other traditional knowledge keepers Their stories are linked to current discussions and debates and their unique journeys reflect the diversity of Indigenous languages knowledges and approaches to inquiry Indigenous Research Theories Practices and Relationships is essential reading for students in Indigenous studies programs as well as for those studying research methodology in education health sociology anthropology and history It offers vital and timely guidance on the use of Indigenous research methods as a movement toward reconciliation *A Practical Introduction to In-depth Interviewing* Alan Morris, 2015-05-18 Are you new to qualitative research or a bit rusty and in need of some inspiration Are you doing a research project involving in depth interviews Are you nervous about carrying out your interviews This book will help you complete your qualitative research project by providing a nuts and bolts introduction to interviewing With coverage of ethics preparation strategies and advice for handling the unexpected in the field this handy guide will help you get to grips with the basics of interviewing before embarking on your research While recognising that your research question and the context of your research will drive your approach to interviewing this book provides practical advice often skipped in traditional methods textbooks Written with the needs of social science students and those new to qualitative research in mind the book will help you plan prepare for carry out and analyse your interviews **Access** Brinda Jegatheesan, 2008-08-08 Examines the nature and seriousness of fieldworkers problems of failure to gain access achieve comprehension and avoid intrusion This volume speaks of access to human subjects data dealing with methods and concerns about intrusion Canadian Social Policy, Fifth Edition Anne Westhues, Brian Wharf, 2012-05-25 Social policy shapes the

Tippins,Michael P. Mueller,Michiel van Eijck,Jennifer D Adams,2010-08-05 As the first book to explore the confluence of three emerging yet critical fields of study this work sets an exacting standard The editors aim was to produce the most authoritative guide for ecojustice place based education and indigenous knowledge in education Aimed at a wide audience that includes but is not restricted to science educators and policymakers Cultural Studies and Environmentalism starts from the premise that schooling is a small part of the larger educational domain in which we live

and learn Informed by this overarching notion the book opens up ways in which home grown talents narratives and knowledge can be developed and eco region awareness and global relationships can be facilitated Incorporating a diversity of perspectives that include photography poetry and visual art the work provides a nuanced lens for evaluating educational problems and community conditions while protecting and conserving the most threatened and vulnerable narratives Editors and contributors share the view that the impending loss of these narratives should be discussed much more widely than is currently the case and that both teachers and children can take on some of the responsibility for their preservation The relevance of ecojustice to this process is clear Ecojustice philosophy is a way of learning about how we frame or perceive the world around us and why that matters Although it is not synonymous with social or environmental justice the priorities of ecojustice span the globe in the same way It incorporates a deep recognition of the appropriateness and significance of learning from place based experiences and indigenous knowledge systems rather than depending on some urgent ecological crises to advocate for school and societal change With a multiplicity of diverse voices coming together to explore its key themes this book is an important starting point for educators in many arenas It brings into better focus a vital role for the Earth s ecosystems in the context of ecosociocultural theory and participatory democracy alike Encompassing theoretical empirical and experiential standpoints concerning place based knowledge systems this unique book argues for a transformation of science education s intellectual tradition of thinking that emphasizes individual cognition In its place the book offers a wisdom tradition of thinking living and being that emphasizes community survival in harmony within itself and with Mother Earth Glen Aikenhead *Ending Denial* Wayne Warry,2008-01-01 Warry examines conservative arguments and mainstream views that promote assimilation and integration as the solution to Aboriginal marginalization *Critical Social Work Praxis* Sobia Shaheen Shaikh,Brenda A. LeFrançois,Teresa Macías,2022-03-31T00:00:00Z What we think must inform what we do argue the editors and authors of this cutting edge social work textbook In this innovative expansive and wide ranging collection leading social work thinkers engage with social work traditions to bridge social work theory and practice and arrive at social work praxis a uniting of critical thought and ethical action Critical Social Work Praxis is organized into sixteen sections each reflecting a critical social work tradition or approach Each section has a theory chapter which succinctly outlines the tradition s main concepts or tenets a praxis chapter which shows how the theory informs social work practice and a commentary chapter which provides a critical analysis of the tensions and difficulties of the approach The text helps students understand how to extend theory into praxis and gives instructors critical new tools and discussion ideas This book is the result of decades of experience teaching social work theory and praxis and is a comprehensive teaching and learning tool for the critical social work classroom
