Applied Economics Raymond Taylor Bye,William Wallace Hewett,1928

Consumer Perception of Food Attributes Shigeru Matsumoto,Tsunehiro Otsuki,2018-06-19 Food credence attributes are food features that are difficult to verify even after consumption Consumers today are concerned about many food credence attributes including animal rights contamination risk fair trade practice genetic modification geographical origin and organic farming For the past several decades many scholars have analyzed the value consumers place on credence attributes and have reported that consumers will pay a premium for foods with these desirable properties In addition their studies reveal that individual consumers place

greater importance on some credence attributes than others For example some are seriously concerned about animal welfare while others are solely concerned about food safety One of the objectives of this book is to summarize recent empirical findings from scholarly works on how consumers value food credence attributes Such knowledge would benefit producers processors retailers and policy makers Another objective of this book is to discuss the effectiveness of the programs that have been introduced to strengthen the relationship between producers and consumers Many programs have been developed to more effectively inform consumers regarding food production processes

Pocketbook Politics Meg Jacobs, 2007-02-20 How much does it cost We think of this question as one that preoccupies the nation's shoppers not its statesmen But as *Pocketbook Politics* dramatically shows the twentieth century American polity in fact developed in response to that very consumer concern In this groundbreaking study Meg Jacobs demonstrates how pocketbook politics provided the engine for American political conflict throughout the twentieth century From Woodrow Wilson to Franklin Roosevelt to Richard Nixon national politics turned on public anger over the high cost of living Beginning with the explosion of prices at the turn of the century every strike demonstration and boycott was in effect a protest against rising prices and inadequate income On one side a reform coalition of ordinary Americans mass retailers and national politicians fought for laws and policies that promoted militant unionism government price controls and a Keynesian program of full employment On the other small businessmen fiercely resisted this low price high wage agenda that threatened to bankrupt them This book recaptures this dramatic struggle beginning with the immigrant Jewish Irish and Italian women who flocked to Edward Filene's famous Boston bargain basement that opened in 1909 and ending with the Great Inflation of the 1970s *Pocketbook Politics* offers a new interpretation of state power by integrating popular politics and elite policymaking Unlike most social historians who focus exclusively on consumers at the grass roots Jacobs breaks new methodological ground by insisting on the centrality of national politics and the state in the nearly century long fight to fulfill the American Dream of abundance
