Form And Substance An Advance Rhetoric:

Form and Substance, an Advanced Rhetoric Richard M. Coe, 1981 **Toward a Grammar of Passages** Richard M. Coe, Conference on College Composition and Communication (U.S.), 1988 Richard M Coe has developed such a grammar one which uses a simple graphic instrument to analyze the meaningful relationships between sentences in a passage and to clarify the function of structure in discourse Working in the tradition of Christensen's generative rhetoric Coe presents a two dimensional graphic matrix that effectively analyzes the logical relations between statements by mapping coordinate subordinate and superordinate relationships Coe demonstrates the power of his discourse matrix by applying it to a variety of significant problems such as how to demonstrate discourse differences between cultures especially between Chinese and English how to explain precisely what is bad about the structure of passages that do not work and how best to teach structure This new view of the structure of passages helps to articulate crucial questions about the relations between form and function language thought and culture cognitive and social processes **Appeals in Modern Rhetoric** M. Jimmie Killingsworth, 2005-09-26 Appeals in Modern Rhetoric An Ordinary Language Approach introduces students to current issues in rhetorical theory through an extended treatment of the rhetorical appeal a frequently used but rarely discussed concept at the core of rhetorical analysis and criticism Shunning the standard Aristotelian approach that treats ethos pathos and logos as modes of appeal M Jimmie Killingsworth uses common accessible language to explain the concept of the rhetorical appeal meaning the use of language to plead and to please The result is a practical and innovative guide to understanding how persuasion works that is suitable for graduate and undergraduate courses yet still addresses topics of current interest to specialists Supplementing the volume are practical and theoretical approaches to the construction and analysis of rhetorical messages and brief and readable examples from popular culture academic discourse politics and the verbal arts Killingsworth draws on close readings of primary texts in the field referencing theorists to clarify concepts while he decodes many of the basic theoretical constructs common to an understanding of identification Beginning with examples of the model of appeals in social criticism popular film and advertising he covers in subsequent chapters appeals to time place the body gender and race Additional chapters cover the use of common tropes and rhetorical narrative and each chapter begins with definitions of key concepts *Theorizing Composition* Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that

have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works *Twentieth-Century Rhetorics and Rhetoricians* Michael G. Moran, Michelle
