David Lehman, Harold Bloom

Form Style 19881997:

Thinking Styles Jieqiong Fan, 2020-08-27 Thinking styles defined as one's preferred way of using abilities have been considered as an important factor in explaining human performance. However, is it worthwhile to pay attention to thinking styles in addition to traditional constructs in individual differences such as personality? Are there good styles or bad styles? Can thinking style be cultivated? Which thinking styles should we aim to cultivate? And how to cultivate these styles? This book answers these questions and more by addressing three major controversial issues in the field of styles: namely, whether thinking styles are distinct from or are part of personality traits; whether or not thinking styles can be changed; and whether or not thinking styles are value laden. Based on a comprehensive review of previous literature and the analyses of results from a mixed method longitudinal study, the book provides solid and intriguing research evidence to the discussion of the above issues. Both academics and graduate students who wish to do research in the field of styles will find the book useful for its insights into the nature of thinking styles. **Learning Transformational Leadership** Stig Ytterstad, Johan Olaisen, 2023-01-01 Based on empirical research, theoretical frameworks, and practice examples, this book presents a deep dive into the topic of transformational leadership. In particular, it investigates whether participants in transformational leadership courses will practice more potent transformation leader qualities after completion of the courses than before. It examines which elements of leadership development can describe what happens in this intervention, as well as whether there is any covariation between transformational leadership and Sternberg's learning style and the role that a coach plays in the development of transformational leadership. An engaging and valuable resource for students, scholars, and practitioners, the book includes pluralistic frameworks, conceptual tools, and lessons for further work. It covers exciting issues for the technical, social, and managerial professions involved in collaborative creative work across disciplines. Excavations at Glasgow Cathedral 1988-1997 Stephen T.
