Schooling Christine Edwards-Groves, Peter Grootenboer, Jane Wilkinson, 2018-09-07 This book is a Festschrift for Emeritus Professor Stephen Kemmis who has a long and eminent career as an educational researcher and academic spanning over 40 years. His work in curriculum evaluation, critical practice, action research, and practice theory has been influential across all continents of the world. The book examines critical perspectives on educational practice and the participatory nature of action research, including practitioner research, particularly as undertaken by teachers in schools. Including vignettes from Kemmis' colleagues and mentors, it draws on contributions from a range of academics whose scholarship has been inspired, influenced, and initiated by his work. The chapters stem from a range of countries including Australia, Canada, Finland, Sweden, the United Kingdom, United States of America, and Trinidad and Tobago, a testimony to the enduring and global legacy of Kemmis' scholarship. Contributing authors include leading educational research scholars, indigenous elders from Australia, and community leaders concerned with environmental sustainability. The concluding focus of this book turns towards practice theory. Kemmis' later work led to the development of the theory of practice architectures and gave rise to the development of the theory of ecologies of practices in education. Research drawing on the theory of practice architectures and ecologies of practices resulted in the leading text *Changing practices, changing education* (Kemmis, Wilkinson, Edwards-Groves, Hardy, Grootenboer, Bristol, 2014, Springer), which reports on an Australian investigation of the ecological relationship between student learning, teaching, professional learning, leading, and researching practices. This theory is now being applied to study practices across a wide range of international contexts, sites, and disciplines, including early childhood, school education, university education, vocational education, and training, community environment, indigenous cultural sustainability, and health.

The Sixth: An Essay in Education and Democracy William Reid, Jane Filby, 2018-10-03 Developments in educational systems are inextricably linked with the social and political evolution of nations. Nowhere is this more clearly to be seen than in the history of the English sixth form. Originally published in 1982, this book, whose authors had been associated with a number of research projects into 16-19 education, traces the tradition of the sixth form from its origins in the public schools of the nineteenth century through to controversies at the time over sixth form and tertiary colleges, and the extension of 16-19 education to embrace youth opportunities programmes and other semi-vocational courses. It shows that the sixth has not only been a significant element in its own right in the adjustment of English society to the challenge of democratic ideals, but has also played a key role in the evolution of secondary education from the endowed school of the nineteenth century through the municipal grammar schools set up after the 1902 Education Act to the comprehensive secondary schools of today. In fact, the fate and future of comprehensive schooling becomes fully understandable only through a study of the sixth form tradition, which has shaped the activities of educationists and policy makers over the last hundred years. The authors conclude that educational policy making is both facilitated and constrained by the existence of enduring traditions stemming from the past; in fact, the work of policy making lies precisely in the constructive reinterpretation of that inheritance. This book describes

and clarifies the nature of the tradition of sixth form education which has been handed down to us and its relation to democratic values and institutions The Qualitative Dissertation Maria Piantanida, Noreen B. Garman, 2009-03-25 Focused on making reflection an integral part of the journey this updated resource guides readers through the process of researching writing and defending a qualitative dissertation
