Fort Verde:

Fort Verde State Historic Park ,2007 **Gateways to the Southwest** Jay M. Price,2016-05-26 Arizona is home to some of the region's most stunning national parks and monuments and has had a long tradition of strong federal agencies along with effective local governments developing and managing parklands Before World War II protecting sites from development seemed counterproductive to a state government dominated by extractive industries By the late 1950s this state that prided itself on being a tourist destination found its lack of state parks to be an embarrassment Gateways to the Southwest is a history of the creation of state parks in Arizona examining the ways in which different types of parks were created in the face of changing social values Jay Price tells how Arizona's parks emerged from the recreation and tourism boom of the 1950s and 1960s were shaped by the environmental movement of the 1970s and 1980s and have been affected by the financial challenges that arose in the 1990s He also explains how changing political realities led to different methods of creating parks like Catalina Pima Ruins and Kartchner Caverns In addition places that did not become state parks have as much to tell us as those that did By the time the need for state parks was recognized in Arizona most choice sites had already been developed and Price reveals how acquiring land often proved difficult and expensive State parks were of necessity developed in cooperation with the federal government other state agencies community leaders and private organizations As a result parks born from land exchanges partnerships conservation easements and other cooperative ventures are more complicated entities than the state park designation might suggest Price's study shows that the key issue for parks has not been who owns a place but who manages it and today Arizona's state parks are a network of lake based recreation historic sites and environmental education areas reflecting issues just as complex as those of the region's better known national parks Gateways to the Southwest is a case study of resource stewardship in the Intermountain West that offers new insights into environmental history as it illustrates the challenges and opportunities facing public lands all over America **Forts of the United States** Bud Hannings,2020-10-02 From forts to blockhouses garrison houses to trading posts stations to presidios missions to ranches and towns this work provides a history of the primary fortifications established during 400 tumultuous years in what would become the United States of America Under each state's heading this substantial volume contains alphabetized entries with information regarding each structure's history The earliest forts established by the Dutch English French Portuguese Swedes and Mexicans and by the temporary appearance of the Russians are listed The colonial American forts many of which were previously established by the European powers are covered in detail Beginning with the American Revolution each of the American military fortifications militia forts settlers forts and blockhouses is listed and described Helpful appendices list Civil War defenses and military hospitals of Washington D C Florida Seminole Indian war forts Pony Express depots Spanish missions and presidios and twentieth century U S forts posts bases and stations A chronology of conflicts that paralleled the growth of the United States is also provided offering insight
