

A COMPLETE REFERENCE

The Programmer's FORTRAN II and IV

A COMPLETE REFERENCE

By CHARLES PHILIP LECHT

*Director, Advanced Computer Techniques
Corporation*

Here is the most complete guide available on the FORTRAN II and FORTRAN IV programming languages. A thoroughly detailed reference, it presents both languages in such a way as to define each independently and to indicate differing characteristics. The book is especially geared to the needs of the practicing computer programmer, but is also useful as a learning tool.

Since the FORTRAN language has relatively few instructions in it, the problem in learning to program in the language does not rest in simply memorizing the format and meaning of each instruction. It consists rather of the tremendous detail the programmer must remember about the characteristics of the instructions. This essential book makes all this information readily and constantly accessible.

Written by an expert in computer documentation, the book shows clearly and concisely the full extent, meaning, and limitations of each type of statement. It describes what an action will *not* do as well as what it will do, and points out possible misuses of information which can be caused by inference, plausibility considerations, or even logical deduction.
