Productivity and U.S. Economic Growth Dale Jorgenson,F.M. Gollop,B. Fraumeni,2016-01-26 Between 1948 and 1979 economic activity in the United States increased almost twice as much as over the entire preceding course of American history The traditional explanation of this remarkable development emphasizes productivity growth In the most sophisticated study to date of the factors currently affecting economic growth the authors of this book show that capital formation is far more important with the growth of labor resources and productivity a distant second Their conclusions rest on a far more detailed empirical base than any ever assembled in studies of economic growth For example the authors distinguish among 81 600 types of labor input broken down by age sex education occupation and industry of employment Similarly they disaggregate capital by industry class of asset and tax treatment Their analysis of economic growth is from the bottom up rather than the top down approach used in earlier work The new findings imply that efforts to revive U S economic growth must focus on increased supplies of capital and labor inputs This is the key to more rapid growth and international competition One of the most important features of the book is the way in which it successfully integrates the theory of producer behavior with the indexing and measurement of production growth The authors present startling new findings showing that less than one fourth of overall growth is attributable to advances in productivity *Forty-five Years of My Life (1770 to 1815)* Luise Radziwill (Fürstin),1912 **State of New York Supreme Court Appellate Division Fourth Department** , Parliamentary Debates (Hansard). Vertrees,1895 **The Political Integration of Ethnic Minorities in Britain** Anthony F. Heath,Stephen D. Fisher,Gemma Rosenblatt,David Sanders,Maria Sobolewska,2013-08-15 Britain has become increasingly diverse over the last fifty years and she has been fortunate to attract relatively highly educated immigrants with democratic values and positive perceptions of the British political system But Britain s ethnic minorities have suffered prejudice harassment and discrimination while politicians increasingly argue that they have failed to integrate adequately into British society and accuse them of leading separate lives In this book we set out to explore the extent and nature of the political rather than the economic integration of Britain s growing ethnic minority population We consider what ethnic minorities in Britain think about and how they engage in British politics This includes political knowledge and interest political values and policy preferences perceptions of parties preferences for parties what parties offer ethnic minorities electoral registration turnout and vote choice other forms of political participation such as signing petitions and demonstrations and trust in political institutions and satisfaction with the democratic system The book

considers the ways in which ethnic minorities resemble or differ from the white British population and differences between different minority groups The analysis is based on the largest and broadest academic survey ever of the political attitudes and behaviour of Britain's main ethnic minority groups the 2010 Ethnic Minority British Election Study in conjunction with the nationally representative British Election Study and other surveys The findings are based on complex statistical regression models but they are presented and interpreted for more general readers To what extent does discrimination at work and social exclusion alienate ethnic minorities from the political process Are those minorities who associate more with those from their own ethnic group less engaged politically Are those who were born in Britain better integrated than immigrants This study addresses these and related questions Despite there being many reasons for minorities to disassociate themselves from British politics they engage in positive and constructive ways But there are important differences between the nature of white British and ethnic minority political engagement and between different minority groups and especially between immigrants and their descendants As a result politicians and political parties should not take the political support of ethnic minorities for granted
