Regimes of Value in Tourism Emilie Crossley, David Picard, 2017-10-02 Drawing from ethnographic work in five continents this book demonstrates how different regimes of value in tourism can coexist collide and compete across a varied geographic terrain Much theory in tourism economics defines value as a measure of monetary worth a concept governing commodity exchange and a gauge for tourist satisfaction The research included in this volume shows that tourism not only feeds off existing conceptions of value as a monetary category but that it is also instrumental in reproducing and reinforcing those subjective morally heightened and highly intangible values that make tourism and the tourism economy a complex social cultural political and psychological phenomenon The book pushes the debate about the tourism economy beyond a simplistic understanding of producer consumer relations instead suggesting a refocus on the social spatial and temporal lags in tourism production and the ensuing differentiated regimes of values This book was published as a special issue of the Journal of Tourism and Cultural Change
